

CURRICULUM PHYSICAL EDUCATION

Rationale

Physical Education are integral parts of the learning process in school education system. They have crucial role in all round development of the student. Physical Education explain students about their health, safety, well being and physical activity participation in context of scientific fields such as physiology, nutrition and psychology etc. Yog is an ancient art that focuses on healthy mind in healthy body. The great saints promoted yog as a universal element that enhances the physical, mental, spiritual aspects of a human being. Worldwide recognition of yog resulted in United Nations declaring 21 June an annual International Yoga Day. As per National Curriculum Framework (NCF), 2005 & National Policy on Education 2016 report, Physical Education is a part of school curriculum. The aim of education system is to build citizens who can contribute in all aspects of life; holistic development of an individual; which cannot be achieved without Yog and Physical Education program at school level. The aim of physical education is to build a healthy citizen through physical activities that may be evaluated during competitions, inter-community sports contests, internal competition, special programs at school level etc. Such activities boost cooperation, discipline, competitive spirit, democratic values, socialization, culture, national spirit, employment and peace to a child. Researches show that regular physical activity can help in reduction of several diseases and improvement in overall quality of life. Individual health is influenced by biological, social, economic, cultural and political forces which can be indicated through mortality and nutritional indicators. Physical Education develops proficiency in movement skills, physical activities and movement concepts, and acquires an understanding of body moves in students. Physical activities are a powerful medium for learning, through which students can acquire and refine personal behavioral, social and cognitive skills.

Objectives

The main objectives of this course are:

- to appraise the courses in sports, physical education
- to understand the concept of Physical Education
- to learn origin and various paths of yog.
- to broaden the understanding of Physical, Physiological, Psychological, Social and Spiritual aspects of human beings.
- to provide an in-depth knowledge of different aspects of health, diet and nutrition

- to enhance the knowledge about health with special reference to lifestyle disorder.
- to provide knowledge and skills in Sukshma Vyayama, Assana, Pranayam, Meditation & Physical Fitness Test.
- to apprise career aspects in Physical Education, sports and yog
- to educate and inculcate ethics and values
- to educate the learners about sports competition and tournament organization.
- to educate about various sports injuries and their management.
- to promote awareness of health and wellness.
- to promote health, safety and physical activities.
- to understand allied fields of physical education

Approach

The course has been designed to provide conceptual and practical exposure to the learners in Physical Education and related areas for creating very relevant and professional approach to Physical Education. - IV. The focus is also on building an academic – industry collaboration for wider practical orientation of the learners which will help in enhancing their employability.
- V. Throughout the course Physical Education and Yoga are looked at as a resource, profession and industry.

Eligibility Conditions

Pass certificate in Secondary Education

Medium of Instruction

English (The course shall be translated in Hindi and regional medium)

Duration of the Course

The duration of the course shall be one year, with a maximum of 5 years to complete the course.

Weightage

Theory : 70%

Practical : 30%

TMA : 20% of Theory

Teaching Methodology

Theory- Printed self learning materials with face-to-face contact sessions for academic support.

Practical

Assignment- One assignment shall be administered for continuous assessment.

Evaluation Procedure

Theory Paper 70 marks

Practical 30 marks

Tutor Mark Assignment (TMA) 40% of the Theory

Pass Criteria 33% in each component

Course Structure

Distribution of Marks and Study hours for each module are as follows;

Module	Name of Module	Marks	Study Hours
1	Concept of Physical Education and Yog	10	24
2	Dimensions of Physical Education and Yog	14	33
3	Holistic Health	14	33
4.	Physical Education and Sports Sciences	16	39
5.	Yogic Practices	16	39
	Total	70	168

Practical

No.	Content	Marks	Study Hours
1	Measurement of Health related Fitness Tests(All the Components)	5	12
2	Measurement of Physical and Motor Fitness Test (All the Items)	5	12
3	Skills of any Team/ Individual Game	5	12
4	Yog Practical-I - Sukshma Vyayama - Asana (Surya Namaskar, Forward Bending, Backward Bending, Inverted Poses, Twisting, Balancing, Standing)	5	12
5	Yog Practical-II - Shatkarma (Jal Neti, Kunjal, Kapal-bhati, Tratak) - Pranayam - Mudra - Bandh - Meditation	5	12
6.	Record File & Viva	5	12
	Total	30	72

Course Description

Module - 1: Concept of Physical Education and Yog

Weightage: 10 Marks

Study Hours: 24 Hours

Approach

This module is developed to acquaint learners with the basic concept and historical development of Physical Education and Yog. The learner would be able to understand ethical values inculcated through physical education. They will be able to learn the importance of wellness and how physical fitness and wellness can be promoted. They will be able to learn various career avenues available in physical education & yog.

1. **Introduction and Historical Development**
2. **Ethics and Values**
3. **Physical Fitness & Wellness**
4. **Career Aspects**

Module - 2: Dimensions of Physical Education and Yog

Weightage: 14 Marks

Study Hours: 33 Hours

Approach

This module is designed to familiarize the learner with various dimensions of physical education and yog. They will be able to learn how physical education and yog can help to promote physical aspect. They will be able to learn the physiological changes and adaptations. The learner will be able to learn the psychological benefits of physical activities and understand the social values as well as understand the spiritual aspects through yog.

5. **Physical and Physiological aspects**
6. **Psychological aspects**
7. **Social aspects**
8. **Spiritual aspects**

Module - 3: Holistic Health

Weightage: 14 Marks

Study Hours: 33 Hours

Approach

This module is designed to make learner understand the spectrum of health and role of diet and nutrition for promoting health. He will be able to learn complexity of obesity and disease management, awareness about lifestyle disorder. The learner will be able to understand the conceptual framework of the school health program.

9. **Introduction to health**
10. **Diet and Nutrition**
11. **Awareness of Lifestyle Disorders**
12. **School Health Programme**

Module - 4: Physical Education and Sports Sciences

Weightage: 16 Marks

Study Hours: 39 Hours

Approach

This module is developed to acquaint learners with the practioners of the physical education program and sports. The learner would be able to understand various sections of population practising sports. They will be introduced to scientific process of sports training and performance enhancement, procedure and talent and sports performance. They will be able to understand different aspects of organization of competition and tournament. They will be able to understand various injuries associated with sports and their management.

- 13. Physical Education for various populations**
- 14. Sports Training**
- 15. Test and Measurement**
- 16. Organization of Tournaments**
- 17. Athletic Injuries, First Aid and Safety**

Module - 5: Yogic Practices

Weightage: 16 Marks

Study Hours: 39 Hours

Approach

This module is designed to help learners understand the importance of Yoga as unification of physical, mental, intellectual and spiritual aspects of human being through various yogic practices. The learner will learn about various components of Hath yog such as Shatkarma, Asanas, Pranayams, Mudra and Bandh. They will be able to know the therapeutic aspects of yogic practices in preventing and curing various diseases.

- 18. Hath Yoga**
- 19. ShatKarma**
- 20. Asana**
- 21. Pranayama**
- 22. Mudra and Bandha**

Learning Outcomes

Physical Education

Lesson-1 Introduction and Historical Development

After studying this lesson, the learner will be able to:

- explain the meaning and importance of physical education.
- recognize different ages and period in historical development of Physical education.
- become familiar with concept of yog and discuss its historical development.
- list need and importance of yog- physically, socially and mentally.

Lesson -2 Ethics and Values

After studying this lesson, the learner will be able to:

- explain the concept of sportsmanship.
- describe ethics in sports and role of ethics in physical education and sports and role of physical education teacher in maintaining the code of ethics in sports.
- outline the Olympic values and different ways of incorporating Olympic values among children.
- recognize how to develop social and personal ethics through yog.

Lesson -3 Physical Fitness & Wellness

After studying this lesson, the learner will be able to:

- describe the concept to physical fitness with its importance in life.
- differentiate the type of Physical fitness and its components.
- explain the concept of wellness and enlist the dimensions of wellness.
- recognize the health benefits of yog

Lesson -4 Career Aspects of Physical Education

After studying this lesson, the learner will be able to:

- explain the different career opportunities in Physical Education.
- list the different courses and universities available for Physical Education.
- recognize the qualities of a Physical Education Teacher.

Lesson -5 Physical and Physiological Aspects of Physical Education

After studying this lesson, the learner will be able to:

- distinguish between the isometric, isotonic and iso-kinetic exercises and its effects on our body.
- explain the short-term effect and long-term effect of exercise on the muscular system.
- discuss the effect of exercises on respiratory rate, tidal volume, rate of gas exchange, lung volume, pulmonary diffusion, residual volume in function of respiratory system.
- describe the physiological aspects of yoga that can be observed in shudhi kriyas, pranayama and asanas.

Lesson -6 Psychological Aspects

After studying this lesson, the learner will be able to:

- recognize the different psychological characteristics due to physical, mental, social and cognitive changes in the adolescent age.

- explore the psychological factors and its effects on the performance of an athlete and how it can be improved through sports.
- identify the emotional and psychological impacts of yoga and its benefits.

Lesson -7 Social Aspects

After studying this lesson, the learner will be able to:

- learn micro and macro level of concern in sports socialization and its effects on society.

- imbibe the basic components of integration through sports which helps in development of national integration.
- identify the social factors that affect the performance of an athlete.
- recognize the effect of yog on holistic wellness and social well being of an individual.

Lesson -8 Spiritual Aspects

After studying this lesson, the learner will be able to:

- recognize the concept of inner awareness
- identify the importance of mantra chanting
- experience the wisdom of Ashtang yog
- describe the concept of Meditation

Lesson -9 Introduction to Health

After studying this lesson, the learner will be able to:

- explain the concept of Health
- outline the different dimensions of Health
- illustrate the principal of Health in day to day life
- recognize the factors that affect their life.
- acquire knowledge about yogic concept of health.

Lesson -10 Diet and Nutrition

After studying this lesson, the learner will be able to:

- describe the concept of diet and nutrition and the role of food choices in determination of health and durability of the individual.
- differentiate between macro and micro nutrients and their requirements in our body.
- define and explain the exact meaning of balanced diet.
- explain the yogic concept of diet and what is a good diet according to this concept.
- classify the three different types of yogic diet.

Lesson -11 Awareness of Lifestyle Disorders

After studying this lesson, the learner will be able to:

- recognize the concept of quality of life and how does lifestyle affect the quality of life.
- classify the dimensions of quality of life and physical and psychological disorders affecting the quality of life.
- illustrate the management skills of lifestyle disorders and role of yoga in day today life.
- identify the importance of yog in our day to day life.

Lesson -12 School Health Program

After studying this lesson, the learner will be able to:

- become familiar with the concept of school health programs and its main objectives along with its compulsion and evolution.
- outline the aspects of school health program and identify the features of health services, healthy environment and health education.
- identify the members of school health committee and their respective responsibilities.
- illustrate basic yogic practices for school children.

Lesson -13 Physical Education for various Populations

After studying this lesson, the learner will be able to:

- outline the effect of physical activities for growth and development of children and identify the exercises for various different age groups of children.
- discuss the need of physical exercises and activities for especially abled people in the society.
- explain the benefits of regular exercises for women in day today life.
- differentiate between moderate and vigorous exercises designed for different adults and their needs.

Lesson -14 Sports Training

After studying this lesson, the learner will be able to:

- recognize the concept of sports training and its principles.

- identify the various components of physical fitness and sports training.
- differentiate between aerobic and anaerobic sports training methods and its requirements.

Lesson -15 Test and Measurement

After studying this lesson, the learner will be able to:

- list the benefits of test and measurement in field of physical education and sports.
- recognize the need and importance of test and measurement and its contribution to the evaluation process.
- list the components physical fitness.

Lesson -16 Organization of Tournaments

After studying this lesson, the learner will be able to:

- list the various types and methods of tournaments .
- differentiate between Intramural and Extramural tournaments.
- learn to organize a sports event and the preparations required for the organization of the sports events.
- list and draw the different types of fixtures used in organizing sports events.

Lesson -17 Athletic Injuries, First Aid and Safety

After studying this lesson, the learner will be able to:

- explain the anatomy of athletic injury and classification of injuries in sports on basis of its nature and location.
- outline the principles of first aid and common causes of injuries.
- illustrate the preventive measures of athletic injuries.
- learn safety precautions at school, home, road and sports ground.

Lesson -18 Hath-Yog

After studying this lesson, the learner will be able to:

- explain the concept of Hath-Yog.
- recognizes different ages and period in historical development of Hath- Yog
- outline the importance of Nadis and chakras
- list the benefits of Hath- Yog

Lesson -19 Shat-Karma

After studying this lesson, the learner will be able to:

- recognize the meaning of Shat- Karma
- identify the various components OF Shat – Karma
- acquire shat karma skills to detoxification of body
- explore the benefits and precaution of shat karma

Lesson -20 Asana

After studying this lesson, the learner will be able to:

- recognize the concept of Asana and its importance in day today life.
- explain the preparatory practices
- illustrate Surya namaskar
- differentiate forward bending, back bending and inverted bending asanas.
- list the twisting and balancing asanas.

Lesson -21 Pranayama

After studying this lesson, the learner will be able to:

- recognize the concept of pranayama and its importance in day today life.
- classify the pre pranayama activities
- identify the various components of pranayam.
- demonstrate various pranayam
- progression of pranayama to meditation

Lesson -22 Mudra and Bandha

After studying this lesson, the learner will be able to:

- describe the meaning and importance of Mudra
- recognize the different types of Mudras.
- explain the meaning and importance of bands.
- identify the types of bands and its importance.
