National Institute of Open Schooling (NIOS) Secondary Course Lesson -18: Constructions Worksheet - 18

1. Draw a line segment 10 cm long. Divide the line segment in the ratio $2: 3$. Measure each part of line segment and also write the steps of construction.
2. Draw a line segment $A B=8 \mathrm{~cm}$. Find point $C$ on it such that $A C=3 / 4 A B$
3. Construct a triangle ABC such that the three sides of the triangle are $5 \mathrm{~cm}, 4 \mathrm{~cm}$ and 6 cm respectively.
4. Construct a triangle PQR such that $\mathrm{PQ}=6.5 \mathrm{~cm}, \mathrm{QR}=7.4 \mathrm{~cm}$ and angle $\mathrm{Q}=45^{\circ}$
5. Construct a right angle triangle $A B C$, where angle $B$ is right angle, base $B C=5 \mathrm{~cm}$ and hypotenuse $\mathrm{AC}=8 \mathrm{~cm}$.
6. Construct a triangle ABC in which $\mathrm{BC}=8 \mathrm{~cm}, \angle \mathrm{~B}=75^{\circ}$ and $\mathrm{AB}+\mathrm{AC}=13 \mathrm{~cm}$
7. Construct a triangle ABC in which $\mathrm{BC}=8 \mathrm{~cm}, \angle \mathrm{~B}=45^{\circ}$ and $\mathrm{AB}-\mathrm{AC}=2.5 \mathrm{~cm}$.
8. Construct a right triangle whose base is 10 cm . and sum of its hypotenuse and other side is 16 cm .
9. Construct a triangle if its perimeter is 12.5 cm and two angles are $45^{\circ}$ and $60^{\circ}$
10. Construct a right angled triangle whose hypotenuse is 10 cm and one of its other two sides is 6.5 cm .
