Lesson 7- Major Landforms and Their Economic Significance

Worksheet-7

1. 'The uplifted portions of earth surface are called mountains, but all uplifted areas are not mountains.' Justify the statement with suitable examples.
2. What will happen if internal forces uplifting the Mt. Everest are slower than erosion?
3. On the outline map of the world mark any one fold mountain from each continent except Antarctica.
4. Fold mountains and block mountains both are formed due to internal earth movements. Analyse the process of formation and write two similarities and two difference of both mountains.
5. Mountains are economically significant for human being. Justify.
6. Describe the process of formation of following plateaus with illustrations-
 - a. Inter-montane plateau
 - b. Piedmont plateau
7. 'Plateaus are storehouse of minerals.' Explain.
8. Give one example each of the following plateaus from India:
 - a. Inter-montane plateau
 - b. Piedmont plateau
 - c. Continental plateau
9. Graphically present (by using pie diagram or bar diagram) the shares of mountain, plateau and plain covering the world.
10. Describe the four types of depositional plains with suitable examples.
