Learner Support Centre Toll Free No.: 1800 180 9393, E-mail: lsc@nios.ac.in
WELCOME TO NIOS

Dear Learner

The National Institute of Open Schooling (NIOS) is an autonomous organization under the Government of India, Ministry of Human Resource Development (MHRD). It is the largest open schooling system in the world with around 2.02 million learners currently on roll at the secondary and senior secondary level. NIOS has national and international network with more than 15 Regional Centres, 2 Sub-Centres and about 5,000 study centres for its Academic and Vocational Programme within and outside the country. It provides access to learner centric quality education, skill up-gradation and training through open and distance learning mode. The delivery of its programmes is through printed material coupled with face to face tutoring (Personal Contact Programmes), supplemented by use of Information and Communication Technology- Audio/Video Cassettes, Radio Broadcast and Telecast etc.

NIOS has been vested with the authority to train the untrained teachers at Elementary Level. The training package for D.El.Ed. Programme has been developed by the NIOS in collaboration with other agencies working in field. The Institute offers a very innovative and challenging Two-year Diploma in Elementary Education Programme for in-service untrained teachers in different states according to RTE 2009.

I take the pleasure of welcoming you all to this Diploma Course in Elementary Education Programme of National Institute of Open Schooling (NIOS). I appreciate your contribution in elementary schooling of the children of your state. As per RTE Act 2009, it becomes essential for all school teachers to be professionally trained. We understand that your experience as a teacher has already given you requisite skills needed to be a good teacher. Since it is now mandatory by law, you will have to complete this course. I am sure your knowledge and experience, so far accumulated by you, will certainly help you in this Programme.

This D.El.Ed. Programme is through Open and Distance Learning (ODL) mode and provides you ample opportunity to be professionally trained without being disturbed from your regular working as a teacher.

The self-instructional materials developed specifically for your use would be helpful in creating understanding and help you in becoming a good teacher apart from becoming qualified for your job.

Best of luck in this great endeavour!!

Chairman (NIOS)

1. INTRODUCTION

Teacher Education is one of the important components to determine the quality of a teacher. Untrained teachers remain deprived of becoming aware of realizing many good qualities of a teacher. Teaching is a profession which requires development of typical feelings and skills of harnessing the good qualities in a learner.

To ensure that all untrained teachers acquire the requisite qualifications, SSA provides for 60 days of training for teachers who have not received any training before their recruitment. But this training cannot be deemed to be equivalent to requisite training qualification as prescribed by the NCTE. However, after the notification of the "Right of Children to Free and Compulsory Education Act 2009 effective from 1st April 2010, it is imperative that all teachers teaching at the elementary level, if not trained, shall have to acquire training qualification within a period of five years.

The number of untrained teachers is so large that it may not be possible to train all of them through face to face formal system. Alternative strategies like Open & Distance Learning system is considered to be an effective strategy to complete this gigantic task.

With this backdrop, it has been decided to develop and implement an elementary teacher training programme through Open & Distance Learning mode for untrained teachers teaching in elementary schools.

The entire training strategies for in-service untrained teachers need to be based on the basic principles enumerated below:

i. Promotion of child friendly and barrier free education for all children,

ii. Promotion of child centred pedagogical processes leading to more of activities for experiential learning, exploration, inquiry, discovery, etc.

iii. Based on NCF 2005 and to guide all our plans for facilitating teaching learning processes in different subject areas. It centres around five key guiding principles:

- Connecting knowledge to life outside the school;
- Ensuring that learning shifts from rote methods;
- Enriching the curriculum so that it goes beyond textbooks;
- Making examinations more flexible and integrating them with classroom life;
- Nurturing an overriding identity informed by caring concerns within the democratic polity of the country.

iv. Promoting a non-threatening assessment system with in-built process for continuous assessment system. Teacher preparation needs to look at CCE as an important area of learning for the teachers.

v. RTE Act 2009 bans corporal punishment and private tuitions by teachers. Accordingly the teacher preparation plan also will provide ways and means of making the classrooms more child-friendly for children so that every child learns well as desired under the Act.

2. Objectives of the Programme
The objectives of the Programme are to
- enable teachers to understand and address diversity in their context;
- empower them to improve quality of classroom processes/transaction;
- develop capacity in them to promote child friendly, child centered processes in school;
- familiarize them with appropriate teaching learning processes;
- facilitate them to develop leadership & problem solving skills among children;
- sensitize them to contribute towards safeguarding child rights

3. Target Group and Eligibility Conditions

Untrained Teachers working at Primary level (I-IV/V) having Sr. Secondary Qualification (or its equivalent) with at least 50% marks in aggregate (for SC/ST/OBC/PH candidates a relaxation of 5% marks admissible) and Untrained Teachers working at Upper Primary level (V/VI – VIII) having B.A./B. Sc. Qualification. State sponsorship is mandatory.

4. Duration

The Minimum duration of the programme is two years. However, the registration of a learner to the programme shall be valid for a period of three years.

5. Programme Structure

The basic principles on which the programme is structured is based on the functions a teacher is expected to perform at the elementary schools, be it engaging in the classroom processes, mobilizing the community, participation in the corporate life of the school, or implementing the whole school development plan. Accordingly, the programme structure is evolved as presented below:
Programme Structure of Two Year Diploma in Elementary Education

| 511 | School – Based Activities | School based activities divided into three parts:  
• Case study of a school child  
• Maintenance of records and registers and  
• Contribution to school programmes | 4 |
| 512 | Workshop – Based Activities (First Year) | Workshop Based Activities of **First Year** is of 4 credits comprises of varieties of activities during 12-day workshop  
• Preparation of lesson plans on language, Maths, EVS, Sc/S.Sc.  
• Preparation of Teaching and Learning materials and aids on the three subjects  
• Development of portfolio in any one subject based evaluation  
• Preparation of balanced question paper based on design and blueprints  
• Observation of Demonstration lesson  
• Participation on process evaluation | 4 |
| 513 | Workshop – Based Activities (Second Year) | Workshop Based Activities of **Second Year** is of 4 credits comprises of varieties of activities during 12-day workshop  
• Concept mapping in any two subjects- language, Maths, EVS, Sc/S.Sc.  
• Acting on Art, Physical & Health and Work Education  
• Analysis of Time Table/annual activity calendar  
• School community relationship  
• Seminar presentation  
• Participation on process evaluation | 4 |
| 514 | Practice Teaching | Practice Teaching is of 8 credits. A teacher trainee will be required to give 10 practice lessons in each of the four subjects (Language, Mathematics, Environmental Studies and Science/ Social Science). S/he will be allotted to a mentor and supervisor in the school (a senior teacher of the school) S/he will be evaluated through the following Evaluation criteria :  
• Lesson planning  
• Subject matter competence  
• Teacher’s guidance  
• Pupil participation in the lesson & its management  
• Pupil Evaluation  
• Evaluation of Practice Teaching process by Head of the school | 4 |
|  | **Total Credits** | **64** |

7. **Detailed Unit Structure**
Course 1: 501-Elementary Education in India: A Socio-Cultural Perspective

Rationale

This course presents an overview of the elementary education at the national and global levels. It is aimed at describing the historical progression of elementary education to help the teachers understand the nature and development of elementary education in a holistic way. This course has been designed based on the needs of the society and varied life experiences to facilitate fair understanding of elementary education in the contemporary Indian society.

Working on the suggested readings and activities given at the end of each unit will provide profound understanding of elementary education.

Specific Objectives

- To develop an understanding of the trends, issues and challenges being faced by elementary education.
- To develop an overview of the universalization of education at the national and international levels.
- To appreciate the role of various initiatives such as, DPEP, SSA, RTE, etc., for universalization of elementary education
- To develop an understanding on the status of elementary education in pre-independence and post-independence periods.

Block 1: Elementary Education in India: A Retrospect

Unit 1: Indian Education System –I

- A brief overview of the ancient Indian Education System; the concept of ‘Guru’ of the yore and the professional teacher of today.
- Significant recommendations of the Commissions and Committees during the British period upto 1947 with reference to elementary education.

Unit 2: Indian Education System –II

- A brief overview of the significant recommendations of the Commissions and Committees with reference to elementary education in post independent India, particularly the Education Commission, 1964-66.
- Structure of Elementary Education of 8 years (5+3) with 5 years of Primary and 3 years of Upper Primary.

Unit 3: Education as a Fundamental Right

15
• Reasons for non-achievement of goals of Universalization of Elementary Education (UEE) since Original Article 45 of the Constitution.
• 86th Constitutional Amendment, 2002; Article 21 A; Emergence of Education as a Fundamental Right.
• Rights of Children to Free and Compulsory Education (RTE) Act, 2009. Detailing the provisions of the Act in terms of :
  - Rights of the Child
  - Roles and responsibilities of the teacher
  - School governance and management
  - Curriculum and evaluation imperatives.
• A brief reference to Rules to the RTE Act, as approved by the States concerned.
• Education in the concurrent list; implications for the Centre and the States.

Unit 4: Organisation Structure for UEE

• Organisational structure of Elementary Education at various levels:
  - National (NCERT)
  - State (SCERT, SIEMT)
  - District (DIETs)
  - Block (BRCs)
  - Cluster (CRCs)
and the roles and functions of the institutions created for each level.

Block 2: Elementary Education in India in the Contemporary Context I

Unit 5: Strategies for UEE-I

• Universalization of Elementary Education (UEE), Project mode for Universalization of Elementary Education

• UP-Basic Education Project, Bihar Education Project, Lok Jumbish, Shiksha Karmi, Projects specific to the state like Maharashtra, Schemes for socially deprived children, Schemes for girls, Schemes for economically backward children, Schemes for distant area children, Schemes for out of the school children, The Scheme for special target group (Handicapped, Devdasi children, etc,

• District Primary Education Programme (DPEP), Objectives of DPEP, Major components of DPEP, Execution plan of DPEP, Strategies and Activities, Impact of the programme on UEE

Unit 6: Strategies for UEE-II: The Sarva Shiksha Abhiyan (SSA)

• Sarva Shiksha Abhiyan (SSA) Programme and its essential features
• Aims and Objectives of the SSA
• Broad strategies of the SSA Programme
• Financial norms under SSA Programme
• Development of school and other related facilities
• Mid Day Meal and its contribution in SSA
• Harmonization of RTE Act, 2009 and Sarva Shiksha Abhiyan

Unit 7: Planning and Management of UEE
• Decentralization of Educational Management, 73rd, 74th Constitutional Amendment.
• Planning at micro and macro levels.
• Management and governance issues in Elementary Education.
• School management vis-à-vis the RTE Act, 2009.
• Networking national, state and district level institutions for effective management and capacity building.

Block 3: Elementary Education in India in the Contemporary Context II

Unit 8: Preparing Teachers for Elementary Education
• Models of Elementary teacher education, including integrated models.
• Thrusts of NCF, 2005 for school education at the elementary stage.
• Salient aspects of National Curriculum Framework for Teacher Education (NCFTE), 2009-10 for preparation of elementary teachers.
• Pedagogical issues and concerns of the primary and upper primary sub-stage of elementary education.
• Teacher as a reflective practitioner.
• Implementation of the Teacher Eligibility Test (TET).

Unit 9: Preparing Teachers for Education of Disadvantaged:
• Issues on Access and Retention
• Barriers to access
• Education for Scheduled Castes & Scheduled Tribes
• Muslim Minorities
• Migrates
• Children with Special Needs (CWSN)
• Urban Poor and deprives & geographically remote children
• Working children
• Academic support system and teacher empowerment
- Inclusive Training of Teachers
- Empowering teachers to protect child rights in schools

**Unit 10: International Scenario in Elementary Education**

- Major thrusts of Jomtien Conference (1990) and the impact on E-9 countries, South Asian region.
- Elementary education initiative in developing and developed countries.
- Role of international agencies in UEE (UNESCO, UNICEF, World Bank, DFID, SIDA).
- Education for All (EFA) initiatives.

**Course 2: 506-Understanding Children in Inclusive context**

The teachers should have a fair understanding of the nature and needs of children in order to teach effectively and help children grow in a holistic way. Effective teaching is not possible without understanding the child in entirety. This course will help you to understand individual differences among children and deal with them accordingly. Teachers are supposed to create a facilitative environment and promote child friendly pedagogical processes where every child feels free to express his/her views, feels un-threatened, and constructs knowledge based on their experiences. The teachers should appreciate the need for protection of rights and entitlements of children for their smooth development. The discussion in this course will make you more sensitive and insightful towards children within their socio-cultural context.

The course is aimed at developing understanding of basic concepts and principles of child development and their implication for teaching and learning. Teachers can steer the children in the development of their overall personality. The understanding of individual differences, such as gender issues and socio-economic factors will help them teachers create facilitative environment for children with special needs.

**Design of the Course**

This course is designed in a manner which facilitates the achievement of the following objectives:

- To explain the role of a teacher in understanding children.
- To discuss strategies for personality development of children.
- To understand the learners and their learning process.
- To undertake field-based activities to understand the concepts in-context
- To additionally go through readings suggested at the end of each unit to enable the teachers to be familiar with various concepts discussed in this Course.

**Rationale**

This course is designed for teachers to understand childhood and children at the elementary stage. This is a foundation course upon which teaching skills and competencies are based. The purpose of
the course is to equip you with the background knowledge that needs to develop an understanding of
the elementary school child and his/her socio-cultural contexts. It seeks to develop and build
sensitivity towards special needs of the children so as to make the classroom environment healthy
and efficient.

Specific Objectives

This course intends to achieve the following specific objectives:

- To develop an understanding of different aspects of a child’s physical, motor, social and
  emotional development.
- To empower teachers for selecting and using appropriate methods and media for teaching
  children.
- To build up understanding for development of personality of children in an inclusive
  environment.

The course comprises of 13 units organized within four Blocks given as follows. The main concept
included in the units are given in bulleted form under each unit.

Block 1: Basics of Child Growth and Development

Unit 1: Understanding the Child
- Understanding growth and development of child
- Principles/characteristics of growth and development
- Relationship between growth and development
- Stages of growth from infancy to childhood and their implications
- Stages of development (Physical, Social, Emotional, Motor, Cognitive, and Moral) and
  implications of stages of development for teaching and learning process
- Factors for facilitating the growth and development
- Role of teacher in growth and development of children

Unit 2: Role of Heredity and Environment
- Concept of heredity and environment
- Mechanism of heredity, factors and importance of Environment
- Relative significance of heredity and environment in understanding the child
- Implication of heredity and environment for child development

Block 2: Personality Development of Children

Unit 3: Developing Personality and its Assessment
• Nature and concept of personality
• Characteristics and dimensions of personality
• Theories of personality; development of self-concept, values, attitudes, perception and motivation; Leadership behaviors
• Assessment of factors affecting personality
• Role of teachers in personality development

Unit 4: Developing Thinking Skills

• Stages, types and tools of facilitating thinking
• Development of critical, convergent and divergent thinking
• Empowering child to take rational decisions based on thinking
• Facilitating questioning skill among children in classroom
• Role of school and teacher in developing thinking skill

Unit 5: Development of Self

• The development of self concept in children
• Conditions that help in development of self concept in children
• Factors affecting the self concept in children
  – Values and moral development in children
  – Role of discipline in development of values
  – Development of attitude and role of teacher in developing good attitude in children
  – Importance of perception and its development in children
  – Characteristics of motivation in children
  – Intrinsic motivation, persistence, choice of challenge and dependency,
  – Developing and enhancing motivation

Unit 6: Developing Creativity in Children

• Concept, Nature and Types of creativity
• Assessment of creativity
• Factors influencing creativity
• Strategies to develop creativity through activities (Activities to develop creativity)
  a) Scholastic
  b) Co-Scholastic
• Developing Learning Materials to foster creativity

**Block 3: Inclusive Education**

**Unit 7: Introduction to Inclusive Education**

• Concept and nature of special education, integrated education and inclusive education
• Factors affecting inclusive school and classroom
• Inclusive learning materials, physical environment and classroom management
• Developing inclusive evaluation system;
• Disadvantaged groups: inclusion of Dalit, Adivasi, child labour, and other forms of inclusion

**Unit 8: Concept of CWSN**

• Defining CWSN
• Categories/types of disabilities (mental, physical, emotional, behavioural, learning, etc.) and their effect of children growth
• Factors affecting the growth of disabled children, why are they referred as “Waiting Children”,
• Early identification, assessment and intervention
• PWD Act 1994, Role of Central and State Governments
• How a teacher can play a vital role in handling the CWSN in classroom
• Role of teacher to identity and address CWSN
• Learning requirements of CWSN at elementary stage,

**Unit 9: Education of CWSN**

• Educational needs of CWSN
• Curriculum adoption for CWSN (general curriculum adopted), Facilities to cater to learning needs of CWSN at school
• Inclusion of child with disability in school
• TLM for imparting education
• Classroom adjustment of CWSN
• Concept and role of home-based education
• Use of ICTs for effective learning by CWSN
• Classroom management and CWSN

**Unit 10: Development of Adoptive Skills (DAS), Assistive device (AS), Special Therapies (ST)**

• DAS, AS and ST for children with mental retardation, hearing impairment, locomotors, cerebral palsy & speech impairment, learning difficulties and multiple disabilities, a brief discussion on each device
Block 4: Girl Child and Child Rights

Unit 11: Gender Issues in Education
- Concept of Gender; Differentiation between Sex and Gender
- Biological and gender attributes of boys and girls
- Meaning of Gender discrimination
- Status of boys and girls in our society
- Causes of gender discrimination
- Gender discrimination in Schools and classrooms
- Need to counter discriminative gender practices
- Role of school and teachers.

Unit 12: Empowering Girl Children
- Concept of Empowerment: Meaning of Empowerment
- Indicators of Empowerment
- Need for Empowering Girls
- Role of Education in the Empowerment of girls: Empowerment through formal and non-formal education
- Initiatives for Empowering Girls: Mandate of the constitution
- Government Policies and Initiatives, NPEGEL
- Programmes for Girls from rural areas, other initiatives [Mahila Samakhya]
- Role of Agencies in Empowering Women and Girls: Role of Government and NGOs, Local bodies, Role of Schools and teachers,
- Life Skills for Girls: Concept of Life Skills, Life Skills for Girls, Role of Schools and Teachers.

Unit 13: Child Rights and Entitlements
- Meaning of Human Rights and Rights of the Child
- UN Initiatives on Rights of the Child: Main objectives and purpose of UN Declaration
- The Right of Children to Free and Compulsory Education Act,2009 and Rights of the Child,
- Protection of Rights of the Child: Need for protection of Rights of the child,
- Mandatory provision of National Commission for the Protection of Child Right (NCPCR);
- Violation of Rights of the Child: Child Labour: Meaning of child Labour
- Need for abolition of child Labour
- Measures for banishing child Labour
- Executive summary of Planning Commission about abolition of Child Labour in India,
- Judiciary for Child Labour Abolition
• Violation of Rights of the Child within the school: Instances of violation of Rights of Child within the school
• Corporal punishment and Rights of the Child
• Need for banning corporal punishment
• Role of teacher in protecting Rights of the Child, code of conduct for teachers.

Course 3: 502-Pedagogic Processes in Elementary Schools

Design of the Course

• The course will have field-based assignments
• To develop the skill of teaching
• To correlate theory and practice of teaching of school subjects
• To understand the pedagogic perspective and approach
• To empower teachers for effective teaching

Rationale

The crux of all pedagogic efforts is to enhance the quality and extent of learning experience of children within the confines of schooling conditions. With this pedagogic perspective teacher and teaching are considered facilitators and facilitating process of learning.

This course will focus on equipping the prospective teachers with conceptual clarity of pedagogic processes so that they can select and use most appropriate methods and strategies for effective teaching in different contexts. They will assess the children’s progress in diverse situations basing on which they shall undertake appropriate modifications in the teaching learning process. Pedagogic study will enable teachers to understand school subjects with specific context of children and process of learning.

Specific Objectives

• To help the teachers in understanding the nature of children and the ways the children learn in the school/classroom situations.
• To develop capacities of teachers to reflect, reason and make conceptual understanding of pedagogic practices and learning process.
• To empower teachers to select, integrate and use most appropriate methods and strategies for effective facilitation of learning of children.
• To expose the teachers to different modes of assessment of learning and enable them to uses those effectively to promote classroom learning.
• To acquaint the teachers with the different tools and techniques of ICT available for enriching the learning processes in and out of classroom

Block 1: Learning and Teaching Process

Unit 1: Learning and Teaching during Early Schooling
• Learning: The concept and process, Learning as meaning making, Factors affecting learning-maturation, motivation, context/environment
• How children learn – through experience, participation/doing, observation, imitation, trial and error, insight/reflection. Learning through construction of experiences.
• Teaching: traditional views, teaching as facilitation/management of learning

Unit 2: Approaches to Learning and Teaching
• Traditional Teacher-centered and Subject-centered approaches: Characteristics, utilities and limitations.
• Competency-based approach: Characteristics, uses and limitations
• Constructivist approach: Premises of Radical and Social Constructivism, characteristics, relevance and limitations
• Child-centered approach: Characteristics, utilities and limitations

Unit 3: Methods of Learning and Teaching
• Characteristics of effective method of teaching and learning
• Dominantly instructional methods: Lecture-cum-demonstration, Discussion, Induction and Deduction,
• More learner friendly methods: Heuristic, Discovery, Inquiry,
• More contextual methods: Play-way, Problem solving, Cooperative and Collaborative Learning
• Combination of methods used in constructivist teaching-learning process

Unit 4: Learner and Learning-Centered Approaches and Methods
• Concepts and characteristics of learner-centered and learning-centered approaches with exemplars
• Comparison of teacher-centered, learner-centered and learning-centered approaches.
• Activity-based approach as learner and learning friendly approach:
  ➢ Activity and its elements,
  ➢ Characteristics of activity-based approaches
  ➢ Methods used in the approach
  ➢ Combination of variety of activities (both curricular and co-curricular) for meaningful and holistic learning
  ➢ Advantages over other approaches
  ➢ Issues in classroom management associated with the approach

Block 2: Management of Learning-Teaching Process

Unit 5: Management of Classroom Processes
• Management of Group and Individual learning situations,
• Management of Time and Space for classroom teaching and learning,
• Seating arrangements for activity-based teaching-learning methods in the classroom,
• Management for motivation and discipline in the classroom,

Unit 6: Teaching and Learning Materials
• Categories of TLMs,
• No cost and low cost contextual TLMs,
• Involvement of students in collecting/preparing, using, storing TLMs and its advantages for their learning,
• Textbooks as TLMs: Proper use of textbooks for learning,
• Learning beyond the textbooks: Searching for other sources of learning in the context of school learning,

Unit 7: Management of Multi-Grade and Multi-Level Situations
• Different multi-grade situations and the issues of learning management in each situation,
• Space, grade and curricular management in multi-grade situations,
• Multi-level Class: Concept and Issues,
• Facilitating learning in multilevel/heterogeneous classroom,
• Other forms of diversities in the classrooms (arising out of gender, ethnic, CWSN, cultural, linguistic characteristics of learners) and their management for effective learning

Unit 8: Planning Learning Activities
• Annual plan of curricular and co-curricular activities (for entire school and for each class),
• Preparation of annual scheme of lessons (Class-wise and Subject-wise or Major competencies-wise): the need and procedure,
• Lesson Plans for each content unit/competency,
• Lesson Note/Diary: the need and process of maintaining,

Block 3: Emerging Issues in Classroom Learning

Unit 9: Integrated Learning- Teaching Process
• Concept of integration, need and relevance at elementary education level
• Types and Process of integration,
• Planning and organizing integrated learning experiences,
• Integrated text materials (integrated textbooks, materials and activities),

Unit 10: Contextualizing Learning Processes and Materials
• Meaningful learning in learner familiar, local specific context,
• Learning and Socio-cultural context,
• Use of folk materials in the teaching learning process during early schooling,
• Using socio-cultural elements in planning learning activities in the classroom,
• Early education of tribal children using their socio-cultural contexts and materials,

Unit 11: ICT in Learning
• ICT: Conceptual framework, Relevance of ICT in school learning,
• Tools of ICT: Hardware (different audio, video, and audiovisual devices) and software’s (internet, websites, social networks etc.) their use in classroom learning
• Planning for ICT integration in classroom transactions,

Unit 12: Computer-assisted Learning
• Computer, its major components, basic knowledge of computer operations,
• Using computer as an accessory of learning (use of software packages on curricular contents through computer), Knowledge of different types of packages,
• Using computer as a source of learning (accessing internet websites for upgrading content knowledge, social networks for sharing knowledge and interaction),
• Self-assessment and assessment of learners’ achievement through available or developed software,

Block 4: Learning Assessment

Unit 13. Basics of Assessment and Evaluation

• Assessment of learner’s progress: Concept, Differences from Measurement, Evaluation,
• Relation of assessment with expected learning outcomes and processes of classroom transaction, Formative and Summative Assessments and their utility,
• Continuous and comprehensive evaluation (CCE): Concept, process and the need,
• Use of quantitative and qualitative data for effective CCE,

Unit 14: Tools and Strategies of Assessment

Assessment OF learning, Assessment FOR learning, Assessment AS learning: Concepts and relevance, Characteristics in terms of purpose, timing, and strategies

Unit 15: Using the results of assessment for improving learning

• Tools and strategies according to the mode of assessment,
• Basic knowledge of construction and use of Achievement tests using different types of test items, Construction and conduct of unit tests,
• Fundamentals of the following tools and techniques:
  Rating Scales, Check list, Questionnaire, Observation, Interview, Portfolio
• Knowledge of construction of different types of test items (Objective-based): Extended Response (Essay), Restricted Response, Objective, Open-ended test items and their utility.

Unit 16: Learning and assessment

• Recording and reporting the results of assessment,
• Sharing the results with students, their parents, teachers, and other stakeholders with specific purpose for each category of stakeholders,
• Identification of areas of strength and weakness from the results of assessment and formulation of follow up programmes for improving the quality and levels of learning.

Course 4: 507-Community and Elementary Education

Design of the Course

• To understand the whole school development in the perspective of RTE
• To develop the relationship between teacher, parents and community.
• To make aware the teachers in educational change
• To develop the skills of leadership qualities among teachers
Rationale and Aim

This course will help teachers understand the interface between education and society regarding elementary education to India. It introduces the relationship between teacher and community for school development. The programme showed the partnership among the school and society to improve quality of elementary education as per the needs of the community. The school should be located at a place which is easily accessible to all children. The discussion will empower teachers as how to communicate with the children as well as community so as to enrol, retain and move towards better learning achievement.

Specific Objectives

- To understand the role of community in school development
- To relate working of the school to communicate in a better way with community
- To evaluate school facilities and the influence of other resource persons in the context of school development
- To explore community resources and use them in school environment
- To appreciate the process of managing school community symbiosis

Block 1: Society, Community and School

Unit 1: Society and Education

Society and social relationships in India: Introduction to society; Evolution of and diversities in Indian society and unity in India as a nation; Society and education linkages; School as an organ of society (School as a cross section of society) (1000 words- linkages to course 1 of the programme).

Unit 2: Community and School

Understanding community (society vis a vis community); Elementary education in the context of community; Community and school interface; School as a community; Influence on language development, cultural development, way of life (including festivals) and development of different life skills

Unit 3: Contribution of Community in School Education

Role of parents, community in a holistic manner (Advocacy; Community as a resource for school; Community in development of learning material); Experiences and research studies;

Unit 4: Provisions for Community Participation under SSA and RTE

(Linkages to Elementary Education in India, Course 1 Block 2)

Policy provision, Role of parent teacher association/ mother teacher association, School Management Committee; Self help group; Main objectives of Panchayati Raj and their role as an institution in EE, EE and partnership with community (pros and cons), Experiences and research studies;

Block 2: School Systems
Unit 5: Entitlements of the child and school provisions

Right based approach to education (human right in context of school and child); Right to Education considered as human right; Right of Children to free and compulsory Education Act 2009 Key aspects of Whole School (meaning and nature): children’s approach to school (barrier free access), Children’s experience in school campus (basic child friendly elements including parking space for vehicles, cycles,...), Children’s experience in classrooms (space, sitting arrangement features, light, ventilation, , veranda,), Children’s safety and security in school (fire, water, wind, and other emergency hazardous situations), Facilities in school for effective learning (indoor and outdoor school spaces for pedagogic use), Facility for Mid-Day Meals, Facility for drinking water and toilet for every child (adequate safe drinking water and sanitation), Facilities for sports and games, Facilities for gardening, Promotion of child friendly child centered pedagogical processes with more of activities for experiential learning, exploration, inquiry, discovery, etc. (Link with Pedagogical Processes in Elementary Education Course 3, Block 1)

Unit 6: Teacher & School

Teachers in school context; SSA interventions in School system for its development; Professional development of teachers (locating the professional development in school environment- Professional development programme through SSA involving School Community Partnership); Teacher Leadership

Unit 7: Teacher Leadership

Concept of Leadership; Types of Leadership (Democratic, Autocratic); Leaders and Rejecters’; Leadership Skills; Teacher Competency, knowledge; Performance and commitment to educational change; Convincing Conversations; Decision Making and Problem Solving;

Unit 8: Relationship with education agencies

Role of Education Bodies: SSA Structures (DRC, BRC, CRC), Training and Curriculum (Universalization of Elementary Education Mission, SCERT, DIET); Role of Voluntary Agencies to help for the developmental stages at elementary school level; Concept of Agencies of education, Types of agencies of education, Liaison of different agencies of education with central government and state government, Role of head teachers and teachers vis-à-vis society.

Block – 3: Managing School Community Interface

Unit 9: Community Mobilization (Practice Based)

Ways and means to mobilize communities in school education: Case Studies, Best Practices across states (Link to community based project on “Teacher Leadership, Community Mobilization”)

Unit 10: Management of School

Meaning and Nature of School Management; Components of management and their rules (Planning, Budgeting, Organizing, directing, controlling, coordination, decision making, evaluative activities and programmes), Types of Management: Participatory and non-participatory-Process of Participatory management

Unit 11: Resource Management of School & Community
Type of Resources: Human, Material & financial sources of income – government, other agencies, local bodies, voluntary contribution from society, endowment, Savings Exam fees.

Unit 12: Management approaches of School Community Partnership

Management Approaches – Meaning, nature and scope, types of approaches man power,

- Cost benefit,
- Social demand,
- Social justice

Relevance of each approach to strengthen school & Community Partnership.

Differentiating management and organization of School-Community Partnership and process of strengthening relationship between the two agencies

Supplementary Material: Video on Cases of Community Mobilization across states

Group-2: Teaching & Learning in School Subjects at Elementary Level

NCF 2005 is going to guide all the plans for facilitating training processes in different subject areas. It centres around five key guiding principles:

1. Connecting knowledge to life outside the school;
2. Ensuring that learning shifts from rote methods;
3. Enriching the curriculum so that it goes beyond textbooks;
4. Making examinations more flexible and integrating them with classroom life;
5. Nurturing an overriding identity informed by caring concerns within the democratic polity of the country.

Course 5: 503- Learning of Languages at Elementary Level

Design of the Course

- To develop the skills of teaching languages
- To understand young learners and their learning context
- Some units to be field-based

Rationale and Aim

This course focuses on the teaching of languages to the learners at the elementary level. The aim is also to expose the student-teacher to contemporary practices in language teaching. This course is based on a constructivist approach to language learning. The teacher will be enabling to create an environment which encourages learners to experiment with language learning.

Specific Objectives

- To enable teachers to grasp general principles in language learning and teaching
- To develop classroom management skills, procedures and techniques for teaching language
- To examine issues in language assessment and their impact on classroom teaching
• To develop competence in teaching languages at the elementary level
• To develop understanding about language – concept, nature, structure, functions, importance
• To develop insight into the process of language learning and acquisition
• To develop acquaintance with various approaches, methods and techniques of language teaching
• To sharpen the skills needed to become an effective language teacher

Block 1: Understanding Language

Unit 1. Introduction to Language
• Language – concept, function, importance
• Linguistics and Grammar; concept of standard language;
• Social context of language; Psychology of language
• Language Skills: Listening, Speaking, Reading Writing
• Language and Literature

Unit 2. Languages in India
• Languages in India – Scheduled Languages, Mother Tongues & Regional Languages; Classical Languages (Sanskrit, Arabic, Persian); Official Language;
• Place of Hindi in India
• Place of English in India
• Language Education Policy in India – Three Language Formula; NCF 2005

Unit 3. Language Teaching-Learning
• Language Acquisition & Language Learning;
• Sociolinguistic and Psycholinguistic Basis of Language Learning
• Role of Grammar in language learning
• Various methods and approaches to language teaching – Grammar-Translation; Structural Approach; Communicative Approach
• Inculcation of values and development of life skills through teaching-learning of language and literature
• Learning disability in language: Dyslexia and dyslexics

Block 2: Skills associated with Language Learning

Unit 4. Listening- Speaking Skills
Oral-Aural Approach to language teaching

Techniques for classroom teaching of listening and speaking: Nursery Rhymes; Recitation; Dramatization & Role Playing; Conversations; Story Telling; Discussions in pairs and groups; Co-curricular activities – Competitions: Debate, Elocution, Poetry Recitation, Extempore Speech, etc.

Aids – Audio/Video Programmes; Language Labs

Dictation as a technique for testing listening comprehension and correct spellings (A good learner should be able to write correct spelling on listening)

Accuracy vs. fluency

Unit 5. Reading Skills

Importance of Reading in Language; Difference between silent and loud reading

Methods/Approaches to teaching-learning of Reading: Phonic, Alphabet, Word, Sentence, Discourse Methods, Psycholinguistic Approach – Meaning vs. Graphics in reading

Inculcating the love for reading among pupils: reading for pleasure and reading for knowledge; Use of libraries, class libraries, exchange of books among peers; fiction, story books, newspapers, etc.;

Book Therapy for personality development and healing: Reading and discussing books

Connecting reading with writing: Reading Comprehension, Familiar Text and Unseen Passages; Paraphrasing, summarizing for testing comprehension

Vocabulary building – Active vs. Passive Vocabulary

Unit 6. Writing Skills

Beginning writing – practicing alphabets, words, sentences; importance and elements of good handwriting – legible and aesthetically written; helping children to develop a good handwriting; handwriting and personality; handwriting as an indicator of dyslexia

Qualities of good Writing: grammatically correct, communicative – lucidity & brevity; simple vs. flowery language

Techniques for teaching writing skills in lower classes: Picture Compositions, Developing stories from given outline, etc.

Advanced Writing Activities: Paragraph and Essay Writing, Letter Writing, Story Writing, Poetry Writing

Block 3 : Language Learning in the classroom

Unit 7. Literature

Role of Literature in Language Learning

Objectives of teaching literature – Sensitivity and Sensibility; creativity and imagination; Understanding life and people
• How to teach different forms/Genres of Literature: Poetry, Drama and Prose – Essays, Short Stories, Novels, Fiction and non-fiction; scientific writing
• Development of Values through literature
• Developing Unit Plans for classroom teaching

Unit 8. Lesson Planning for Language Class
• Concept & importance of lesson planning
• Listening-Speaking Class
• Reading Class
• Writing Class
• Prose
• Poetry

Unit 9. Materials & Aids in Language Teaching
• Print Material
• Multi-media – Audio, Video
• Teacher Made Low Cost Aids
• Use of Technology: Language Lab; web-based teaching-learning

Unit 10. Evaluation & Assessment in Languages
• Techniques of assessment of proficiency in the 4 Skills – Listening, Speaking, Reading & Writing
• Text book based assessment – prose, poetry, drama

Course 6: 504-Learning of Mathematics at Elementary Level

a. Introduction

The revised syllabus of mathematics formulated on the basis of NCF 2005 for the elementary stage of education reflects the recent developments and trends in mathematics education. It emphasizes conceptual understanding, skill proficiencies and thinking skills in the teaching and learning of mathematics. These competencies are integral to the development of mathematical problem solving ability. Emphasis is also need to be given to reasoning, applications, and use of technology. Advances in technology have changed the way we teach and learn mathematics technology.

Students need to have opportunities to discover reason and communicate mathematics. They are required engage in stimulating discussions and activities where they can explore possibilities and
make connections. These qualitative changes require a change in the teaching and learning approaches, incorporating activity- based and learner – centred methodologies.

b. Objectives

This course will enable the prospective teacher to:

- reflect on the status and issues related to Elementary Mathematics Education;
- attain mastery over the basics of elementary mathematics;
- acquire pedagogical skills of teaching mathematics at elementary stage,
- make effective use of a variety of mathematical tools including technology tools in learning and teaching of mathematics.
- acquire skills of assessing young children’s learning and performance in Mathematical concepts and in using those in enhancing their understanding and performance in Mathematics.

Block 1: Importance of Learning Mathematics at the Elementary Stage of Schooling

Unit 1: How Children Learn Mathematics

- The ways a child thinks
- Stages of Cognitive Development
- Development of Mathematical Concepts
- Mathematics Learning during Early Childhood
- Ways of Learning Mathematics
- Mathematics Phobia
- Making Mathematics Learning Pleasurable

Unit 2: Mathematics and Mathematics Education - Importance, Scope and Relevance

- **Nature of Mathematics**: Logical, precision, systematic, aiming at abstraction.
- **Importance and Scope of Mathematics Education at Elementary Stage**: Evolves from all the experiences of real life experiences, Related to all branches of knowledge, Mathematics knowledge required in solving problems faced in real life situation.

Unit 3: Goals and Vision of Mathematics Education

- **Aims of Mathematics Education**: Broader (higher) and narrower aims of mathematics education at the school stage. Specific aims of mathematics education at the elementary school stage.

Unit 4: Learner and Learning – centred methodologies

- **Emerging Trends in Learning Mathematics Concepts**: Cognitive, Constructivist, Experiential and Activity-based approaches of learning mathematics at the early school stage.
• **Methods Teaching-Learning Mathematics at the Elementary Stage:** Inductive and Deductive, Project, Problem Posing and Problem Solving, ICON Design Model, 5-E Instructional Model, Concept mapping.
• **Making Mathematics Learning more Challenging and Satisfying:** Activities for developing creative abilities among primary level students (organization of mathematics club, field study, seminars, symposium, mathematics mela etc) Using mathematics laboratory and library for creative thinking,
• **Communicating Mathematics: Mathematics** Curriculum and classroom practices, role of text books in the teaching-learning process of mathematics, Mathematics Laboratory/Resource Room, Interaction with learners for dispelling Mathematics phobia and coping with failure. Each of the approaches and methods is to be discussed with concrete examples from the Mathematics curriculum of the Elementary Schools. Searching for all possible alternative processes/methods of solving a mathematical problem have to be encouraged rather than merely arriving at the correct result.

**Block 2: Enriching Contents and Methodology**

**Unit 5: Numbers, Operations on Numbers**

• Numbers and numerals, Number system (Neural/Counting numbers, whole numbers, integers, rational numbers, fractions and decimals),
• Performing four operations on numbers, developing estimation skills and ability to perform mental calculations, Factors, Multiples, H.C.F. and L.C.M.,
• Application of arithmetic in daily life situations, (whole numbers, integers, rational numbers and decimals) Percentages, Interests, Profit and loss, Work and time

**Unit 6: Shapes and Spatial Relationships**

• **Basic Geometrical Figures:** Undefined terms – point, line and plane. Fundamental geometrical concepts- line segments, rays, angles and measures of angles, parallel and intersecting lines.
• **Geometrical Shapes:** Two and Three – dimensional shapes, designs and models with shapes, congruency and similarity, translation, reflection and rotation, symmetry, constructions using geometrical tools, patterns in shapes

**Unit 7: Measures and Measurements**

• Measurement as comparison of two similar entities,
• Standard and non-standard measures of length, area, weight, volume,
• Metric system of measurement
• Measurement of time

**Unit 8: Data Handling**

• Collection, organization and representation of data.
• Elementary statistical techniques for analyzing and interpreting data,
• Pictorial depiction of data,

**Unit 9: Algebra as generalized Arithmetic**

• Algebraic terms and expressions, Operations on algebraic terms,
• Use of unknowns in expressing generalization resulting from patterns, converting problems to its mathematical structure and then solving them – Algebraic equations

While clarifying the mathematical concepts, they are to be presented with appropriate methods and approaches as stated in the Unit4 of Block 1 are to be associated for clarity in the process of classroom transactions of these concepts.

Block 3 : Learner Assessment in Mathematics

Unit 10: Approaches to Assessment of Learning Mathematics

• Traditional and Emerging Approaches: Characteristics of traditional approach, Characteristics of assessment in the Activity-based approach. Dimensions of mathematical learning included for assessment at the Elementary stage.
• Emerging trends in assessment: Self assessment, peer/group assessment, collaborative assessment, portfolio assessment, Assessment through assignments, projects, and concept mapping.

Unit 11: Tools and Techniques of Assessment

• Continuous and comprehensive evaluation, oral and paper - pencil tests, More use of open-ended questions in the classroom transactions and assessment tests. Developing competency-based items, preparing unit tests.
• Assessing students’ interest by way of observation, participation in exhibitions, quizzes, puzzles, games, developing teaching learning materials.
• Standard multipurpose sets of materials for conducting CCE in Mathematics at the Elementary level.

Unit 12: Follow up of Assessment of Learning Mathematics

• Information from the Assessment: Mode of collecting and recording assessment information for each learner, providing feedback to the learners, their parents and other stakeholders.
• Follow up of the Assessment: Diagnosis of weaknesses and strengths in learning mathematical concepts and processes, planning and providing remedial measures and providing further enrichment activities for learners having strength in the concept.

Course 7: 505- Learning Environmental Studies at Primary Level

a. Introduction

The present EVS syllabus for primary classes is designed to forge an integrated perspective for the primary stage of schooling that draws upon insights from Science, Social Science and Environmental Education. Environmental education is about helping learners become global citizens with critical thinking skills; sensitivities and respect for the natural environment; and pragmatism towards the socio-economic environment. This Course will help you strengthen your understanding of environment and environmental education. It will also help you to develop a holistic perspective of environment and the significance of environmental studies at the primary stage of education.
Within the formal education system, the curriculum and textbooks provide the vital link between policy and practice; however no learning process can be successful if left only to the curriculum and textbooks. The key to the formal education system is the teacher. Teacher’s active participation and innovativeness is crucial for effective teaching and learning to take place.

In addition to the subject of ‘environment’, the Course also deal with a variety of teaching-learning techniques which will help you create a learning environment in your classrooms which is congenial for child-centred and child-driven learning. The Course module has been designed in a way so that it will empower you with new ideas for effective transaction of environmental studies at the primary stage of education.

We hope that you will find this Course useful in accomplishing the mission of environmental studies in formal education.

**Course Objectives**

The Course will enable the Teachers:

- To understand the importance and concept of ‘Environment’
- To develop a holistic perspective of Environment
- To realize the importance of learning about ‘Environment’ at the primary level
- To identify local learning resources and expertise related to teaching-learning of EVS
- To design appropriate teaching-learning activities for primary children with focus on interactive and experiential learning
- To assess learning levels of each child, identify learning difficulties and design appropriate strategies for future enrichment

**b. Methodology**

To realize effecting teaching-learning of EVS in schools, it is essential to support teachers in enhancing their understanding of the subject of environment and its links with science and social science. Developing this understanding is critical because unlike most other subjects; EVS is a composite subject comprising science, social science and environmental education. Establishing links and connections thus are crucial for teaching-learning of EVS. This Course provides adequate information, time and space to the teacher pupils to explore and understand the uniqueness of environmental studies as an area of teaching-learning.

In order to ensure that the essence of EVS is maintained in the classroom, it is important that teacher pupils review, reflect and analyze the way they interpret and transact EVS textbooks in the classroom. This Course discusses the philosophy and reason behind the framework and structure of the EVS textbooks. It further argues and justifies that learning of EVS requires being hands-on, exploratory and real-life based.

Real-life based and hands-on activities in a school, carried out in collaboration with selected community members, can contribute significantly not only to students and teachers in the school, but can also enable the school to reach out the community. Such teaching-learning
activities can be carried out with the help of a wide range of simple and interesting exploratory activities that can be undertaken using locally available materials.

The Course also encourages teacher-pupils to review the way one perceives assessment—its purpose and methodology. With innovative teaching-learning techniques, it will be required to re-interpret the objective of assessment and the tools and techniques used for the same.

Content

Block 1: Importance of teaching-learning of EVS at primary level

Unit 1: Importance of Environment at the Early Stage of learning:

- Understanding Environment
- Importance of environment: Types of environment- Natural and Man-madesocio-cultural and economical. Need for preservation of nature; living in harmony with others in family, neighborhood, society, nation and world.
- Valuing environment for learning.

Unit 2: Objectives and Scope of teaching learning EVS at the primary stage

- Why environment studies at primary stage.
- Objectives of teaching-learning EVS at primary stage with special reference to NCF 2005
- Values inherent in Environmental Studies.
- Teaching values: observation skills, correlation, experimentation, extrapolation.
- Valuing our environment: The Indian Heritage.

Unit 3: Pedagogical considerations of EVS concepts at the primary stage

- Characteristics of EVS: composite, contextual, learner centred, no rights no wrong, values are integral components of EVS.
- How do children learn?
- Pedagogical organization of teaching-learning EVS: child’s environment
  - learning laboratory
  - facilitate exploration from known to unknown and concrete to abstract
  - life based learning in classroom
  - lack between and across disciplines
  - encouraging dialogues and questioning
  - role of teacher
- expanding the child’s universe.
Unit 4: Curricular Provision of EVS at the primary stage

- objectives of environmental studies with special reference to NCF 2005.
- From the syllabus to the text books.
- The EVS text book
- Going beyond the classroom and the text book
- Challenges involved in transacting EVS

Block 2: Curriculum and Pedagogy of EVS

Unit 5: Approaches for Teaching-learning of EVS

- Activity-based approach in transacting EVS concepts. Group-based co-operative and collaborative approaches.
- Challenges in Cooperative Learning.

Unit 6: Methods of Teaching-learning of EVS

- Methods of observation, Creative Expression (Drama, dance, puppetry, music, creative writing), Field visit, Project, Small group discussion, Experiments, Problem-Solving in the process of teaching-learning EVS concepts.

Unit 7: Planning for teaching-learning of EVS

- Preparation of daily lesson notes and annual lesson plans
- Preparation of theme-based lesson plans on EVS concepts
- Develop learning corner for EVS and use them in their daily and annual plans of teaching.

Unit 8: Resources and Materials for teaching-learning of EVS

- Identifying local learning resources and local resource persons for EVS studies. Using local learning resources for appropriate teaching learning strategies.
- Collecting and creating learning activities and low cost and no-cost learning materials from the elements available in the immediate environment of the school/home.
- Resource pool of materials: community resources, developing, maintaining and utilizing other resources - newspaper reports, films, pictures, photographs, collections-seeds, flowers etc., iconic maps and local area maps.
- Understanding role of children and community members for collecting, creating, storing and using contextual TLMs for EVS.

Block 3: Assessment of learning in EVS

Unit 9: Assessing Learning in EVS

- Assessment related to objectives of teaching
• Need purpose of assessing learning in the context of EVS learning objectives.
• Discuss different ways of assessing learning in EVS, CCE in EVS
• Types of assessment, characteristics of assessment
• Learning centered assessment

Unit 10: Tools and Techniques for assessing learning in EVS
• Develop, select and use different tools of assessment:
  ❖ Tests,
  ❖ Observation schedule,
  ❖ Rating Scales,
  ❖ Audio-video recordings,
• Assessment techniques
• Consideration of assessing learning objectives

Unit 11: Using Assessment Results for Enhancement of Students’ Understanding
• Recording and sharing the assessment results with students,
• Identify and analyze strengths and weaknesses of students
• Reviewing and improving the teaching-learning process
• Planning and conducting enrichments activities for further strengthening of the learning of EVS concepts.

Course 8: 508-Learning in Arts, Health & Physicals and Work Education at Elementary Level
Total Credits 4(3+1)

Design of the Course

This Course is designed to provide holistic learning in Arts, Health & Physical and Work Education to every learner. All the three components are to be covered to impart adequate knowledge and enhance desired skills among elementary teachers so that they may be able to facilitate their pupils for learning in these areas. Course content with due weight age of each component is given separately below.

1. ART EDUCATION

Rationale and Aim of the Course
Arts Education offers a significant opportunity for creative expression among the learners. It helps in enhancing life-skills, inculcating values and developing sensitivity to understand and respect the culture of a society. Art, whether visual or performing is an inward experience, something to be felt, thought and lived through. It is both 'doing' and ‘becoming’. Teachers at elementary level of school education are expected to understand the process of artistic development in their pupils, their creative expression and to create an environment conducive for experiential learning among them. A well designed art education course can develop aesthetic sensibility, artistic ability and creative skills in every pupil teacher.

**Specific Objectives**

**The teacher trainees will be able to**

- Understand and appreciate Art Education
- Gain knowledge of different art forms under art education
- Make optimal use of art education for the holistic development of every child.
- Develop Artistic and Aesthetic sensibility by responding to the beauty in different art forms, through genuine exploration, experience and free expression
- Integrate different art forms across the elementary school curriculum

**Block 1: Art Education**

**Unit-1. Understanding Art and Art Education (Theory)**

i) Meaning and Concept of Art Education; Visual & Performing Arts and their significance at elementary level of school education.

ii) Understanding child art

iii) Importance of Art Education (Visual & Performing) at elementary level of school education.

iv) Regional Arts and Crafts and their relevance in education.

**Unit-2. Visual Arts and Crafts (Practical)**

i) Experimentation with different materials of visual arts such as Pencil, pastel colours, poster colours, pen and ink, rangoli materials, clay, mixed material, etc.

ii) Exploration and experimentation with different methods of Visual Arts; Drawing and Painting, Block Printing, Collage Making, Puppetry, Mask making, Clay Modelling, Paper Cutting and Folding etc.

iii) Making a folder of practicals done, preserving one sheet of every art activity.

**Unit-3. Performing Arts (Practical)**

i) Listening/viewing and exploring regional art forms of music, dance, theatre and puppetry.

ii) Preparing and performing any one of the art forms of music, dance, theatre and puppetry.
iii) Planning for a performance/presentation by the student teacher.
iv) Making a folder of covering practical activities.

**Unit 4. Planning and Organization of Art Education for Elementary classes**

i) Planning of art experience for elementary classes- Activities and Time table

ii) Organizing materials for art experience

iii) Organization and facilitation for art experience at elementary level

**Unit 5. Evaluation in Art Education**

i). Evaluation in Art Education

ii). Making of portfolio

iii) Understanding use of various tools and techniques of evaluation, such as Observation Schedule, Projects, Portfolio, Checklist, Rating Scales, Anecdotal Records, Displays etc.

### 2. HEALTH AND PHYSICAL EDUCATION

**Rationale and Aim of the Course**

Health and Physical Education is an integral part of school education at all levels. Research in the field of health and physical education has given rise to new methods as well as skills for effective teaching learning process in the subject at school level. What is needed is a well structured teacher education programme for teachers to provide them with the opportunity to gain knowledge, as also to acquire skills which can help in promoting a healthy lifestyle among students and teachers. Health and Physical Education programme, when implemented effectively, can play a leading role in enabling learners to lead a healthy and active life. The Health and Physical Education Programme has a positive influence on academic achievement, emotional stability and inter-personal relationships. All this can be possible through effective training of teachers for which a well designed teacher education programme in the field of Health and Physical Education is needed.

**Specific Objectives**

The teacher trainees will be able to

i) build a holistic understanding of the concept of Health and Physical Education.

ii) acquire knowledge and experience related to the main aspects of School Health Programme: Healthful School Environment, Health Instructions and School Health Services.

iii) understand the concept of Integrated Development of students’ personality.

iv) organize and conduct an effective Physical Education Programme focusing on children's Integrated Development: Physical, Emotional, Mental, Social and Spiritual.

v) understand the importance of yoga for school children and to acquire knowledge and skills to impart yoga education in school.
Block 2: Health and Physical Education

Unit VI: Meaning and Significance of Health

ii) Significance of health for individual, family and society

iii) Relationship between health and education: health as prerequisite to education and health as a goal of education

Unit VII: Main aspects of School Health Education Programme

i) Healthful School Environment: clean drinking water supply, clean toilets and urinals, safe food, hand washing facilities, drainage, refuse disposal, lighting, ventilation, comfortable seating arrangement, positive & conducive emotional and social environment.

ii) Health Instruction: Food and Balanced diet, communicable diseases, posture, healthy habits.

Unit VIII: Essential Health Services

i) School Health Services: Provision of Health Services to prepare students for optimal learning, Healthful living and good citizenship.

ii) Protection against health hazards at school and home,

iii) provision of first aid in emergency and accidents

Unit IX: Meaning and Concept of Physical Education

i) Meaning and importance of Physical Education

ii) Aims and objectives of Physical Education; Concept of integrated development of personality: Biological, Intellectual, Emotional, Social and Spiritual aspects.

iii) Physical Education Program for all: Intramurals and Extra murals, Mass Fitness programme.

Unit X: Planning and organization of physical education program

i) Principles of lesson planning in Physical Education

ii) Methods of teaching and learning: demonstration method; whole-part-whole method; command method; mirror method

iii) Conducting Mass Fitness Programme: Assembly; March Past; Calisthenics; Sports Meets

iv) Role of teacher in Health and Physical Education at elementary level – as facilitator, as counselor, in identifying deviant students and in taking measures for correcting remediable defects

Unit XI: Game, Sports and Yoga

i) Games and Sports: Basic rules, fundamental skills, marking of play fields
ii) Indigenous Games, Minor games: indoor and outdoor games

iii) Yoga: need and importance for children of 1-14 age group

iv) Yoga Programme: Basic Asanas and Pranayams to meet the health needs of pupils and promote their all round development.

3. WORK EDUCATION

Rationale and Aim of the Course

This course provides an opportunity to the teacher trainees to understand the importance of work, including manual work, as an integral part of school education. It provides an insight to identify various types of age appropriate activities for children keeping in view the local specific needs. There are various methods of transacting and demonstrating work related activities and this course will definitely help the trainees to acquire expertise in different transactional strategies suitable to the content. This course will also enable the trainees to integrate work with the content of various curricular areas - Language, Science, Social Science, Mathematics, Art Education and Health & Physical Education. The course will develop the skills of the trainees in assessing and evaluating the child in continuous and comprehensive manner by preparing and maintaining portfolio and other records. It will make them able to understand the need for involving community and utilizing community resources for the successful implementation of Work Education Programme.

Specific Objectives

The teacher trainees will be able to

- understand the need, concept and nature of work education for elementary stage of education.
- integrate work education with other school subjects
- develop a positive attitude towards work and dignity of labour.
- develop skills of utilizing 'WORK' as a tool for social, cultural, physical and mental development of the child.
- organize and implement periodic plan for work related activities.
- identify and organize community resources for Work Education.
- evaluation of Work Education activities

Block 3 Work Education

Unit XII. Concept of Work Education (Theory)

i) Concept of Work and Work Education

ii) Philosophical, Sociological and Historical Perspectives on Work Education

iii) Aims and Objectives of Work Education

iv) Areas of Work Education

v) Work as a Pedagogic Medium – Work and Learn

Unit XIII. Implementation of Work Education (Theory)

i) Planning and organization of Work Education in schools (Time, Place and grouping of Students)
ii) Planning of Work Education sessions for different classes

iii) Organizing materials for work education at elementary level

iv) Maintenance and storage of materials, tools and equipments

v) Integration of work with different Curricular Areas; teaching learning Strategies for integrating Work and Education

Unit XIV. Skill Development in Work Education (Practical)

Skill Development in any two areas from the list of Activities given below.

Steps to be covered for the conduct of Practicals for skill development:

- Theoretical Background of the specific area
- Materials required
- Method/s followed
- utility
- costing.

ii) It is mandatory to prepare a practical file of the activities.

Note: For skill development Practical’s, it is recommended that regional/local specific areas of work are selected.

Unit XV. Community and Work Education

i) Role of Community in Work Education;

ii) Identification and Utilization of Community Resources for Implementation of Work Education; Mapping of Community Resources.

iii) Orientation of/Advocacy for Parents and Community Members towards the importance of Work Education.

Unit XVI Evaluation of Work Education (Theory and Practical)

i) Importance of evaluation in Work education

ii) How to evaluate Work Education Activities

iii) Indicator-based evaluation

iv) Tools and Techniques for Evaluation

v) Self, Peer, Teacher and Community based Evaluation
Course 9: 509-Learning Social Sciences at Upper Primary Level

a. Introduction

The contents of social Science/social studies as a school subject are based on a certain understanding about their nature and purposes. Instead of treating these as natural and given, this course introduces student-teachers to different perspectives about these subjects. It would also examine the ways in which different visions and understanding of the subjects get reflected in different curriculum, syllabus and textbooks. It asks and suggests how social sciences can develop capacities to critically understand society and social reality around us with reference to time, space and power, structures, institutions, processes and relationships.

b. Objectives

This course would help the learner to:

- develop knowledge and skills to critically understand and analyse the society in which we live by drawing upon the disciplines of history, geography, political science, economics and sociology
- build skills to gather, interpret and analyses data
- critically analyses social science school curriculum, syllabus and textbooks
- know and use different pedagogies to transact the curriculum in a manner that enhances curiosity of children to enquire about social phenomenon and develops their capacities to reflect on the existing society, its institutions and practices in a critical, independent and thoughtful manner
- develop capacities to uphold human and constitutional values of freedom, equality, justice and respect for difference and diversity and challenge the social forces that threaten these values

c. Methodology

Different perspectives about the nature of history, geography, political science, economics and sociology would form the basis of this course to understand that the subject may be conceived in different ways and its purposes are historical and social in character. Analysis of textbooks and curriculum may help students understand how various perspectives about society, children and social science shape these documents and pedagogic devices and how they may be alternatively conceived and transacted in classroom. Reading how children conceptualize and understand the subject matter of different social science components and the ways in which different textbooks and teaching methods allow or obstruct development of abilities for individual/collective reflection would provide another avenue for student teachers to develop their own understanding of social sciences and appropriate pedagogies.

Block I: Understanding Social Sciences as a discipline

Unit 1: Nature of Social Sciences

- Social Sciences: Evolution and Conception
- Social Sciences: Down the ages
• Current Status of Society
• Components of social sciences: polity, culture and economy
• Integration and inter-disciplinary perspective in social sciences

Unit 2: Social Sciences in School Curriculum

The main objective of this unit is to examine forces that have influenced the evolution of social science curriculum which led to changing objectives of Social Science Curriculum

• Colonial legacy; nationalist alternative
• Debates within the post-independence social science curriculum
• National Integration and International understanding
• Debates of communalism, secularism, subaltern perspective
• Perspectives from gender, caste and tribal’s
• International perspective on social science curriculum (UNESCO, example of Social Science curriculum in South Africa)
• Current national thinking and practice regarding social science curriculum

Block II Social Science Subjects and Concepts

Unit 3: History

• Concept of history, content of history at elementary stage
• Methods adopted by social scientists in History
• Importance of history as a part of Social Science curriculum
• Model Lesson Plan

Unit 4: Geography

• Concept of Geography, content of geography at elementary stage
• Methods adopted by social scientists in Geography
• Importance of geography as a part of Social Science curriculum
• Model Lesson Plan

Unit 5: Social and Political Life as an integrated subject of Political Science / Economics / Sociology

• Content of social and political life in social science at elementary stage
• Methods adopted by social scientists in political science, economics and sociology
• Importance of political science, economics and sociology as a part of Social Science curriculum
• Model Lesson Plan

Block III: Issues in Pedagogy of Social Sciences

Unit 6: Understanding the nature of learner and the local context

• Divergent social context
• How children understand social science issues
• Cognitive development and concept formation among the children in middle/upper primary classes with reference to their age (heredity) and socio-cultural (environment) context; significance of these factors for curriculum and pedagogy; case studies of children’s understanding of concepts; children, construction of social science knowledge and classroom interaction.

Unit 7: Teaching Learning Strategies

Teaching methods: heuristics/discovery method, project method, use of narration, comparisons, observations, dialogue and discussion in social science; concept of data, its sources and evidence in different social science disciplines; difference between fact and opinion, identifying bias and prejudices; use of personal/experiential knowledge for Course structure critical thinking;

(Each strategy may be illustrated with examples and with a variety of resources)

Unit 8: Learning Resources: Concept, Need and Importance

Type of Learning Resources: Realia & Diorama, Maps & globes, Models, Graphs, charts & cartoons, Timelines, Books, Newspapers Clippings, Museum, Movies, Internet, Development of Learning Resources, Management of Learning Resources

Unit 9: Assessment in Social Sciences

Continuous Comprehensive Evaluation, Method of evaluation in social sciences based on information recall; understanding, applications and synthesizing; alternative ways to evaluate learning (Port Folio): basis of evaluation, types of objective based questions, importance of grading and marking system.

Course 10: 510-Learning Science at Upper Primary Level

a. Introduction

Scientific method involves observing, looking for patterns, making guesses, checking their validity through experimentation, and thus arriving at principles, theories and laws governing the physical world.

b. Objectives

This section will aim to improve quality of Science Education at elementary level by emphasising on the following objectives.

• Nurture the natural curiosity of the child about the world
Consider what children already know from their everyday experience

Have the child engage in exploratory and hands-on activities, or work with hands to design simple technological units

Arrive at scientific concepts through familiar experiences, activities & experiments, and discussions with peers and teachers

Always ask questions: do not accept statements uncritically

Accordingly the teacher education course will aim to work around the following objectives.

To encourage students to revisit their own conceptual understanding of science

To engage students with various aspects of the nature of science.

To help students understand children’s ideas in relation to cognitive development and Children’s' understanding of scientific concepts.

To help students select and use appropriate teaching-learning and assessment strategies.

To enable students to view science as an inclusive and a democratic enterprise.

c. **Methodology**

The trainees to facilitate the students to study available literature conduct simple activities and experiments, record observation, discussions with peers and teacher, reflect on how they arrived at questions, why they choose certain ways of conducting inquiry etc. The trainees will be facilitated on how to conduct the following:

- Different ways of conducting inquiry: setting up simple experiments and investigations in different contests
- Science- museums, field trips, projects and exhibition.
- Developing different assessment strategies including appropriate questions for paper pencil tests.
- Preparing Unit plans based on concept maps.
- Assessing teaching-learning materials such as books, films, multimedia packages for their relevance and age appropriateness.

**Block 1: Understanding Science**

**Unit 1: Nature of Science**

- History and philosophy of Science- Ancient, medieval and modern period; philosophy of science
- What is science—definition and general characteristics, nature of science, process of science
- Scientific knowledge comprises of: Hypothesis, Theory, Fact, Natural Law, Evidence and Paradigm, Deductive Inference and Inductive Inference

- Scientific Thinking: using empirical evidence (empiricism), practicing logical reasoning (rationalism), and possessing a skeptical attitude (skepticism) about presumed knowledge.

- Scientific methods: what is Scientific method, steps involved in scientific method and Scientific attitude

**Unit 2: Scientific Inquiry**

Concept of scientific inquiry, forms of Scientific

**Process of Scientific inquiry skills**: Engaging learner in scientific process

- *Raising questions*—for enquiry
- *Hypothesizes to get directions*
- Predicting for getting directions for observation
- Observing for collecting information
- Searching for patterns and relationship
- Devising and planning inquiry
- Designing and making equipment
- Measuring and calculating
- *Participating* and communicating
- Self-reflection for self-actualisation
- Inquiry in personal life

**Unit 3: Different Approaches to Teaching Science**

- Methodology of Teaching
- Different approaches with examples: Transmission or expository approach, Process or inquiry approach, Discovery approach.

**Unit 4: Hands on Experiences: Role and Importance**

- Role of firsthand experience in children’s learning,
- Types of investigation: in class and out of school;
- Organizing practical work,
- Safety measures - in & out of school
Block 2: Managing & Measuring Science Learning

Unit 5: Planning & managing science education at upper primary level
- Overview of planning
- Planning and curriculum coverage in science
- Planning at class level: lesson plan
- Identifying and Using various resources: at school level, local level, non-electronic and electronic materials.
- Recording and Reporting

Unit 6: Assessment and Evaluation and Related Issues
- Assessment: What, how and why- concept of evaluation, objectives and specification, types of evaluation, internal assessment
- Continuous and comprehensive evaluation in science
- Using assessment to help learning in science: - identifying hard spots/undergoing remedial learning
- Evaluating cognitive, affective and psychomotor domain
- Structuring assessment of children ideas, skills and attitudes

Unit 7: Challenges and issues in science teaching
- Science for all
- Teaching different abilities
- Knowing advancement in science and teaching science.

Framework for Practical Courses

Practical Course-1: 511-School Based Activities (SBA)
First year: School Based Activities is of 4 credits divided into three parts:
- Case study of a school child
- Maintenance of records and registers and
- Contribution to school programmes

Practical Course-2: 512-Workshop-I (Workshop Based Activities)
First year: Workshop Based Activities of First Year is of 4 credits comprises of varieties of activities during 12-day workshop
- Preparation of lesson plans on language, Maths, EVS, Sc/S.Sc.
- Preparation of Teaching and Learning materials and aids on the three subjects
- Development of portfolio in any one subject based evaluation
- Preparation of balanced question paper based on design and blueprints
- Observation of Demonstration lesson
• Participation on process evaluation

513- Workshop-I I (Workshop Based Activities)

Second Year: Workshop Based Activities of Second Year is of 4 credits comprises of varieties of activities during 12-day workshop

• Concept mapping in any two subjects- language, Maths, EVS, Sc/S.Sc.
• Acting on Art, Physical & Health and Work Education
• Analysis of Time Table/annual activity calendar
• School community relationship
• Seminar presentation
• Participation on process evaluation

Practical Course-3: 514-Practice Teaching (PT)

Second Year: Practice Teaching is of 8 credits. A teacher trainee will be required to give 10 practice lessons in each of the four subjects (Language, Mathematics, Environmental Studies and Science/ Social Science). S/he will be allotted to a mentor and supervisor in the school (a senior teacher of the school)

S/he will be evaluated through the following Evaluation criteria:

• Lesson planning
• Subject matter competence
• Teacher’s guidance
• Pupil participation in the lesson& its management
• Pupil Evaluation
• Evaluation of Practice Teaching process by Head of the school

8. Course Preparation

Learning material is specially prepared by team of experts drawn from different universities and specialised organisation institutes in the area spread throughout the country as well as in-house faculty. The material is scrutinised by the content experts, supervised by the instructors/unit designers and edited by the language experts at NIOS before these are finally sent for printing.

9. Credit System

The Institute follows the “Credit System” for the programmes. Each credit is of 30 hours of study comprising all learning activities. A four-credit course, for instance, involves 120 study hours. The course weightage is expressed in terms of credits. This helps the learner to understand the academic
effort he/she has to put in, in order to successfully complete a course. Completion of the academic programme requires successful clearing of assignments, term-end examinations of each course in a programme and practical components.

10. Support System

In order to provide individualised support to its learners, the Institute/State has a large number of study centres. These are coordinated by the State itself. At the study centres, the learners interact with the Study Centre Coordinator/ Workshop Coordinator, Assistant Study Centre, Resource Person, Mentor, Supervisor and Peer groups, refer to books in the library and interact with the Coordinator on administrative and academic matters. The support services are also provided through work centres and programme centres.

11. Programme Delivery Strategies

Instructional system in the open system of education carries a great importance. It is the instructional system that makes the open education meaningful, effective and interesting. The following instructional system is adopted for this programme:

I-Core
- Self-instructional Print Material
- Assignments- such as Project work, case studies, port-folio preparation etc.
- Inputs through organizing Workshops
- Delivery of Practice Lessons
- Practical Manuals (PCP, School Based Activities and Workshop Based Activities)
- Practical Handbooks

II- Supplementary
- Audio / Video materials
- Lessons delivered through Teleconferencing
- Interactive radio counselling
- Inputs through Mobile

12. Print Material

The print material is the study materials for both theory and practical courses of the programme. It is supplied to the students in the form of blocks. Each block contains 2-4 units. Each course has a code number. The NIOS sends study materials along with assignments to their respective study centres. If a student does not receive the same for any reason whatsoever, the NIOS shall not be held responsible for that.
13. Tutoring Sessions

In distance education, face-to-face contact between the learners and their tutors is relatively less. The purpose of such a contact is to answer some of your questions and clarify your doubts that may not be possible through any other means of communication. It also provides you with an opportunity to meet your fellow students.

There are academic tutors at the Study Centres to provide guidance to you in the courses that you have chosen for study. Normally, these sessions will be held at the study centres on Sundays and other holidays.

You should note that the tutoring sessions would be very different from the classroom teaching or lectures. Tutors will not be delivering lectures as in conventional teaching. They will try to help you to overcome difficulties that you face while studying for the D.El.Ed programme. In these sessions, you must try to resolve your subject-based difficulties and any other related problems.

Before attending the tutoring session for each course, please go through your course material as per the session schedule and make a plan of the points to be discussed. Unless you have gone through the Units, there may not be much to discuss and may not be fruitful.

Within the general schedule of the programme, the coordinators at the Study Centres will decide on the coverage of these sessions. The Study Centre coordinators will also provide the tutoring schedule. The tutoring sessions will include clarifications required in the print-material. The tutoring sessions are organised for theory courses. In this programme, 9 theory courses (8 compulsory and one optional) having 33 credits on theoretical and 11 practical credits are offered to each student. Tutoring sessions for 9 theory courses are to be organised for each student. There will be minimum of 15 days in a year engaged for tutoring wherein minimum of 75 percent attendance is very essential for each trainee. No credit is allowed for attending tutoring classes. But it will make them eligible to sit in term-end examination. The schedule of tutoring Session is in Appendix-I.

14. Conduct of Practicals

To provide effective support to the practical work, NIOS has set up in consultation with State a number of Study Centres where workshop of 12 days duration in each year of 2-year course will be conducted during long holidays.

The Study Centres are located in DIETs/PTTIs/BRCs where academic tutoring and practical workshop will be conducted. It will be managed by the Study Centre/ Workshop Coordinators. Each Study Centre will be handling maximum of 100 students.

The detailed particulars regarding Study Centre to which you are attached will be communicated to you by the state functionaries /NIOS/Study Centre.

Practicals will be held in the respective schools (working place) and also in the institutions identified as Study Centres. As mentioned earlier, in practical courses, the practical work consists of school-based activities and workshop-based activities, assignments and practice teaching. The School-Based activities, assignments and practice teaching will be carried out in the respective school i.e., the work centre (the place where the teacher trainees work). The workshop-based practicals will be organised in two practical workshops of 24 days duration, i.e., 12 days each spreading over two years. The two workshops include intensive face-to-face interaction to develop skills and competencies in the school
after taking due permission from the concerned school under the guidance of the supervisor (teacher educator) and Principal/Headmaster, Senior Teacher (Mentors). A trainee is expected to go through approximately 750 hours of contact hours of different practical work.

**Practical and Contact Sessions**

The course delivery will have a major component of internship and contact sessions. The internship consisting of practical sessions includes three types of activities such as School Based, Workshop Based and Practice Teaching. A 12-day Workshop in a year, School Based Activities in **FIRST YEAR** supervised by the Supervisor/Mentor and Practice Teaching in **SECOND YEAR**, also supervised by the Supervisor/Mentor. Personal Contact sessions include 15 tutoring sessions in a year at study centres. The number of hours expected to be utilized in these sessions has been envisaged as follows:

- **Workshop based activities (one each for 12 days in a year)** 8 Credits 240 hours
  - Pre workshop Activity 52 hours
  - Workshop Activity (12 days x 7 hrs x 2 yrs) 168 hours
  - Post workshop Activity 20 hours
- **School Based Activities** 4 Credits 120 hours
- **Practice Teaching (40 lessons x 6 hours each)** 8 Credits 240 hours
  (6 hrs include the time for preparation of lesson plan & TLM, discussion with mentor/supervisor, delivery of lesson and feedback)
- **Tutoring support for theory courses** No Credits 150 hours
  (15 days x 5 hrs x 2 yrs)

**Total Contact Hours: 750 hours**

**15. Course Based Assignments**

Course Based Assignments (supplied along with Self Learning Materials) are the integral and compulsory component of the instructional system. There are assignments in every theory course. These assignments are to be submitted to the concerned Study Centre in accordance with the submission-schedule provided separately in the programme guide. In case a student wants to have assignments, he/she can obtain a copy of the same from the Study Centre or may download it from the NIOS website – www.nios.ac.in

The following point should be kept in mind when you prepare the assignments:

i. Make the answer concise and systematic. Always try to avoid irrelevant details and focus on the question and its various aspects.

ii. Take care of the work limit wherever specified in the assignments. Please stick to the word limit as far as possible. At the same time, make the descriptions adequate and not too short. The word limit is set to sharpen the focus of the responses and not to restrict your expression.
iii. You have to write the answers in your own handwriting. If you feel that your handwriting is not properly legible, you may send us typed responses.

iv. You have to send the assignment responses to the study centre you are attached to (as per the date set for each assignment). The schedule for submission of Course Based Assignment is provided in Appendix-II.

There will be three course based assignments (2 theory + 1 practical) carrying a weightage of 30 percent in each course. Practice based will carry 10 percent and theoretical item will carry 20 percent weightage. There will be no option and all the items will be compulsory. In toto there will be 27 assignments. These assignments are to be submitted to the study centre within the date prescribed in the schedule. Always retain a copy of the assignment responses with you.

How to send completed ‘Assignment-responses’ and other issues

Write your enrolment no., name and full address and date at the top right hand corner of the first page of your assignment response(s).

- Write the course title code and assignment code in capital letters in the centre at the top of the first page of your response(s).

(Leave the top left-hand corner blank for office use). The top of the first page of your response(s) should look something like this:

<table>
<thead>
<tr>
<th>Study Centre ............................................................</th>
</tr>
</thead>
<tbody>
<tr>
<td>Course Title............................................................</td>
</tr>
<tr>
<td>Course Code.............................................................</td>
</tr>
<tr>
<td>Assignment Code.......................................................</td>
</tr>
<tr>
<td>Enrol. No. .....................................................................</td>
</tr>
<tr>
<td>Name.............................................................................</td>
</tr>
<tr>
<td>Address...........................................................................</td>
</tr>
<tr>
<td>Date..............................................................................</td>
</tr>
</tbody>
</table>

(Please follow the format strictly. If you do not follow this format we will be obliged to return your responses to you for resubmission. If you do not write your enrolment number and address, your assignment-responses are likely to be lost).

- The assignment-response should be complete in all respects. Incomplete responses will bring you poor grades. Don’t send responses piece-meal they may never be put together in our offices.
- Use only foolscap size paper for your responses. Use ordinary writing paper, not the very thin variety.
- Leave a 3/2” margin on the left and at least 4 lines in between each answer in an assignment response. This will enable the resource person evaluating the response to write useful comments at appropriate places.
- Make sure you answer the questions on the basis of the SLM sent to you.
- You should not send printed articles as your answer to assignments.
- Please keep a copy of the assignment responses that you send us. You may need this in case you have to resubmit it in a situation when it may have been lost in postal transit.
• Remember that any two of more answers to a particular assignment, if found to be identical or very similar, will either be returned unmarked or awarded very low grades. It is entirely the discretion of the evaluator to ask you to re-do the assignment or give a very low grade in such cases.
• Please submit the assignment to the Coordinator/Programme Incharge of the concerned Study Centre by the specified date. If the last date for the submission of the assignment falls on a holiday the assignment response should be submitted on the following working day.

**Assignment Remittance-Cum-Acknowledgement Form and Acknowledgement form for the Evaluator:** Acknowledgement form for submitting the Assignment to the study centre at Appendix-II. This form is used for all the assignments of the D.El.Ed. Programme and get photocopy of this Proforma separately for all the assignments. Acknowledgement form for the Evaluator is also given under Appendix-II.

### 16. Programme Fee

The Programme has been envisaged as self sustained programme. The programme fee will be Rs.6,000/- per year (Rs.12,000/-) per candidate for two years as per guidelines of the MHRD, Govt. of India under SSA. Being an in-service programme, the candidates to the programme will be sponsored by the states concern. *(for further details please refer section 19 and Appendices-III & IV)*

### 17. Learner Evaluation and Certification

**Introduction**

Evaluation in the D.El.Ed. Programme in Open and Distance Learning mode has a multi-tier system comprising of the following components:

- Self-Assessment Exercises within each unit of Study
- Continuous mainly through assignment which are (i)Tutor-Marked and Practical Assignment and (ii) Practical Activities: School Based Activities, Workshop Based Activities and Practice Teaching
- Term-End Examination

**a) Theory Courses**

The theory courses prescribed are as under

**Group-I Core Courses**

i. Elementary Education in India: Socio-cultural Perspective
ii. Understanding children in inclusive Context
iii. Pedagogic processes in the Elementary Schools
iv. Community and Elementary Education

**Group-II Teaching Subjects**

i. Learning languages at Elementary level
ii. Learning mathematics at Elementary level
iii. Learning Environmental Studies at Primary level
iv. Learning Art, Health & Physical Education and work Education at Elementary level

**Group-III Teaching Subjects**

i. Learning Social Science at Upper Primary Level

or

ii. Learning Science at Upper Primary Level

**b) Self-Assessment Exercises/Tests**

In addition to the formal evaluation in each course NIOS provides some exercises/tests on different topics of each course as self-evaluation materials to the candidates. This will not carry any marks but will only be meant for self-assessment by the learner in different aspects of which s/he knows and those on which s/he needs to work more.

**c) Term-End Examination**

Each question paper in external examination will be a balanced compendium of different forms of questions as stated below:

- 15 Multiple choice Questions (MCQs) 15(15) carrying one marks each
- 15 very short answer type question (VSA) 15(15) carrying one marks each
- 10 short Answer Questions (SA) 20(10) carrying two marks each
- 2 Long Answer Question (LA) 20(10) carrying Ten marks each

**NOTE:** Entries outside brackets indicate marks and those inside brackets number of questions

Each course has two components

- Theoretical components carrying 70 marks and
- Assignment component mainly practice based related of the particular course carrying 30 marks

Marks obtained by a candidate in both these parts will be added to determine the total score of a particular candidate in the particular course

The question papers of all courses are based on the prescribed design.

For each examination, fresh Blueprint will be prepared for constructing the question paper/s based on the design.

The question paper setters will be expected to provide the following:

- Blueprint prepared by himself/herself on the bases of the prescribed design
- Question paper and instruction to candidates
- Marking scheme with value points for each question of the question paper
- Item-wise analysis of the question paper in respect of the following criterion are needed
  - The objective tested by the items
  - The topic on which it is based
  - The form of the items (LA, SA, VSA, MCT)
  - The estimated difficulty level (easy, average, difficult)
  - The expected time required for answering the items
The marks carried by each item

This would be a valuable device at the time of moderating each item in the question paper

d) Course Based Assignments
There will be three course based assignments in each course. Two will be based on theory and the other will be practice based carrying a weightage of 30 percent. Practice based will carry 10 and theoretical items will carry 10 percent marks each.

e) Practical Courses (Internship in schools)
For Practical Courses, evaluation comprises three aspects basing on continuous and comprehensive evaluation framework:

i. Evaluation of performance in School-Based Activities (SBA)
ii. Evaluation of performance in Workshop-Based Activities (WBA)
iii. Evaluation of performance in Practice Teaching(PT)

i. School Based Activities(SBA)
School based activities carrying a total weightage of 100 marks stand divided into three parts

- Case study of a school child 30 mark
- Maintenance of records and registers and 35 marks
- Contribution to school programmes 35 marks

Total 100 marks

The last two stands further divided into different parts with their respective weightage

Maintenance of Records and Registers

- Preparation of progress Reports of pupils 7 marks
- Anecdotal Record (based on specific observation) 7 marks
- Maintenance of Lesson Dairy/Notes 7 marks
- Preparation of schedule and conducting substitute classes 7 marks
- Preparation of records of library, laboratory and sports activities for pupils 7 marks

Total 35 marks

Contribution to School Programmes

- Organising morning school assembly and preparing a report on the Process and outcome achieved 7 marks
- Reporting the process of PTA/MTA/SMC (school management committee) meetings and outcome achieved 7 marks
- Organisation of social/national festivals in the school 7 marks
- Organisation of Annual Sports or Annual day of the school 7 marks
- Organisation Excursions/field visit 7 marks

Total 35 Marks

The evaluation criteria for school based activities will be as under:

- Relevance to the course content
- Originality of the idea
• Ingenuity/creativity
• Utility in promoting learning

Marks in this regard could be awarded on the activity as a whole keeping in mind the above criteria

ii. Workshop Based Activities (WBA)
Two workshops of 12 days each are planned to be organized for Teacher Trainee in the Programme of each of the two years. All the proposed workshop activities together carry a weightage of 100 marks each year distributed over them as under:

First Year

- Preparation of lesson plans on language, Maths, EVS, Sc/S.Sc. (6x4)  24 marks
- Preparation of Teaching and Learning materials and aids on the four subjects (4x4)  16 marks
- Development of portfolio in any one subject based evaluation  06 marks
- Preparation of balanced question paper based on design and blueprints (6x4)  24 marks
- Observation of Demonstration lesson  10 marks
- Participation on process evaluation  20 marks

Total 100 marks

Second Year

- Concept mapping in any two subjects- language, Maths, EVS, Sc/S.Sc.(8x2)  16 marks
- Acting on Art, Physical & Health and Work Education (3x8)  24 marks
- Analysis of Time Table/annual activity calendar  10 marks
- School community relationship  10 marks
- Seminar presentation  20 marks
- Participation on process evaluation  20 marks

Total 100 marks

iii. Practice Teaching (PT)
A teacher trainee will be required to give 10 practice lessons in each of the four subjects (Language, Mathematics, Environmental Studies and Science/ Social Science)
S/he will be allotted to a mentor and supervisor in the school (a senior teacher of the subject) the mentor in each subject will supervise at least 5 out of 7 lessons and supervisor will supervise 2 out of 3 lessons.

The Evaluative Criteria for assessing the level of performance of a candidate in practice teaching lessons will be as under

- Lesson planning
- Subject matter competence
- Teacher’s guidance
- Pupil participation in the lesson& its management
- Pupil Evaluation
- Evaluation of Practice Teaching process by Head of the school
For convenience sake each lesson will initially be assessed on a total of 75 marks with the assigned weightage for each evaluated criterion. The head of School will submit a practice teaching evaluation report for each trainee out of 25 marks on Personal Characteristics, Participation in co-scholastic activities, participation in school work, teaching and originality and novelty.

As the overall weightage to practice teaching in the total scheme of evaluation is 75 marks and since there are 40 lessons the obtained score on each lesson will be added up and divided by the lessons observed to get the final score (rounded off) will be added to the evaluation of Head of School out of 25 for each teacher trainee. The total marks scored will be multiplied by 2 to have the final score out of 200 on Practice Teaching for purposes of certification.

In the teaching competency mapping profile, in addition to the space for writing, observation there will also be mention of different criteria with the weightage in the form of rating scale as under required to be filed up by the mentor and the supervisor.

<table>
<thead>
<tr>
<th>Evaluation criteria</th>
<th>Max marks</th>
<th>Obtained marks</th>
<th>Remarks</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lesson planning</td>
<td>20</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Subject matter competence</td>
<td>15</td>

<td><strong>Total</strong></td>
<td>100x2= 200</td>
<td></td>
</tr>
</tbody>
</table>

**Determination of grades for certification**

The marks obtained by candidates on different components of the curriculum as enumerated above will be converted into absolute grades on a five point scale as per the following structure:

<table>
<thead>
<tr>
<th>Marks Range (in percentage)</th>
<th>Letter Grades</th>
</tr>
</thead>
<tbody>
<tr>
<td>85 to 100</td>
<td>A</td>
</tr>
<tr>
<td>70 to 84</td>
<td>B</td>
</tr>
<tr>
<td>55 to 69</td>
<td>C</td>
</tr>
<tr>
<td>40 to 54</td>
<td>D</td>
</tr>
<tr>
<td>Below 40</td>
<td>E</td>
</tr>
</tbody>
</table>

The marks once obtained by a candidate on School-based Activities, Workshop-based Activities and Practice Teaching will be treated as final where 50 percent is the qualifying marks separately. With regards to the Core Courses, Teaching Subjects at the Primary/Elementary Level and Teaching Subjects at the Upper Primary Level a ‘D’ grade (40 percent) will be considered as the qualifying grade level. Those getting below that (grade ‘D’) can reappear for reaching a grade ‘D’ within span of two years or four subsequent examinations held in May and November every year. Those desirous
of improving their grades will also be allowed to do so by re-appearing within aforesaid time limit
with the payment of examination fee as per NIOS norms.

A candidate will be required to get at least a grade ‘D’ (40 percent) in both the sets of examinations
(Theory and Practical with Course Based Assignments) and 50 percent in Practical in first and
second year and 45 percent in aggregate in each year separately to qualify for getting the certificate.

**Note:** The time allowed for individual external theory examination paper is 3 hours for 70 marks.

---

**Re-checking and Re-evaluation of Answer Scripts**

If you have appeared in term end Examinations and you are not satisfied with your result, NIOS provides you an opportunity for Re-checking of your answer scripts in which Re-totalling of marks is done and it is also ensured that no question is left unevaluated. Remember that **the answers are not Re-evaluated during Re-checking.** You are to apply separately for Re-evaluation. You may apply for Re-checking and Re-evaluation of the Answer Script in any subject within 30 days from the date of declaration of result. Apply to the Coordinator of the concerned Study Centre in the prescribed Performa for Re-checking/Re-evaluation of the Answer Script (Appendix-V & VI). You have to pay the prescribed fee of Rs. 300/- (Rupees Three Hundred only) for Re-checking and Rs. 800/- (Rs. Eight hundred only) for Re-evaluation per subject separately to the NIOS through Bank Draft drawn in favour of the Secretary, NIOS, payable at NOIDA. The Re-checking and Re-evaluation will be completed within 45 days of the receipt of your application. However, the Answer Script(s) will not be shown to you or anyone else on your behalf under any circumstances.

18. **Re-appear Examination**

The candidate need to pass individual theory (External and Course Based Assignment) and practical subjects separately and in aggregate as mentioned earlier in each year. If someone failed to clear any
of the subject or its part can again reappear in three (3) subsequent Term-End Examination so as to complete the course with the payment of examination fee as per NIOS norms.

19. Fees of Duplicate Documents and Examination Fees

Dear Teacher Trainee,

This is to inform you that the Workshop-I will be held for twelve days from (date& day) to (date& day) at this centre as per the programme given below.

- Reporting time on the first day is 9 AM
- Show this call letter and submit its Xerox copy
- Show the NIOS Identity Card and submit its Xerox copy
- Read thoroughly Practical Manual (Guidelines about WBA Programme guide) well before coming to the workshop
  - Workshop-I and Workshop-II are compulsory components of NIOS D.El.Ed. Programme
  - They are just like Board examination
  - Hundred percent attendances on all the days and in all the sessions are essential. THERE WILL BE NO RELAXATION IN THIS REGARD.
  - Everyday there will be one or two assignments, which are to be submitted the next day positively. As such you have to work hard for 2 to 3 hours every night and one/two hours next morning too.
  - In view of the above, you have to stay somewhere nearer to study centre

You will not be allowed to continue the Workshop if you would come late or leave early or drop sessions.

Important: you should bring the following to the Workshop-I

- Record of School Based Activities (SBA)
- Programme guide and Assignment booklet
- All course books- Course codes: 501, 502, 503, 504 & 505
- PCP and Practical Manuals
- School text books
- 200 sheets of foolscap white paper for writing the workshop assignments
- Stapler, staple pins, gum tube, multi-coloured sketch pens, scale, pencil, eraser etc.
- A strong cover file to keep your workshop assignments and such other papers

Hope to see you in the Workshop and with best wishes

Yours sincerely,

(Study Centre/ Workshop Centre Coordinator)
Certificate from the Head Master of the Working School & Declaration by the teacher trainee

(The school should keep a Photocopy of this filled-in proforma)

Certificate from the Head Master of the School where the Teacher Trainee is working now (Working School).

(Entries are to be made by the Head Master)

Certified that
1. Sri/Smt. _____________________________________________(full name), a teacher of this School and a trainee of NIOS Diploma in Elementary Education (D.El.Ed.) Programme from __________-(Date) to __________-(date)
2. His/her total teaching experience in this school is ________ years (write in words) and __________-(write in words).

He/she will be permitted to deliver the practice lessons after completing the 1st year and also to carry out the school-based activities in the 1st year in the school.

Address of the School with PIN & Tel. No. with code School Seal

__________________________________________
(Full signature of the Head Master)

Office Seal Date:

Full name in capital letters

---

Declarations by the Teacher Trainee

Mr./Mrs.________________________________________________________ is my mentor and Mr./Mrs. ________________

______________ is my Supervisor

I declare that

a. I shall obey all the rules and regulations as well as the guidelines and instructions of the Workshop. In case I fail to do so, I may be debarred from attending the workshop; which I shall accept without any protest and prejudice.

b. I shall show the Workshop-I completion certification to the Head Master of my school and thereafter I shall start Practice Teaching from January and complete it by August of the next calendar year and I have completed School Based Activities(SBA) during the current year; as per the guidelines and instructions issued by NIOS.

c. In case I fail to do so, I shall inform the Study Centre Coordinator in writing by regd./speed post and I shall accept the decision of the Study Centre Coordinator in this regards without any pretext and prejudice and shall act accordingly.

---

Full Signature of Teacher Trainee

Name:
Enrolment No.:
Date:

Workshop-I
# Declaration by the Head Master

(The school should keep a photocopy of this filled-in proforma)

1. The Head Master is requested to kindly fill in this proforma in his/her own hand
2. He/she is requested to kindly cooperate with NIOS in maintaining and improving the quality of its D.El.Ed. programme
3. If the teacher trainee is insincere or irregular in carrying out the practical activities, he/she may be cautioned about it. If he/she still continues the same, he/she should not be allowed to continue the activities and the matter may please be reported in writing to the Study centre

## Very Important

1. The Teacher Trainee will show the Workshop-I completion certificate (original) issue by the Study Centre Coordinator. Please collect a copy of it from him/her as soon as your school reopens after summer vacation. After seeing that certificate only, he/she should be allowed to deliver the Practice Lessons and the concerned Mentor should be instructed accordingly.
2. Mentors and Supervisors are requested to sit in the class for the entire period and observe the lessons and write the comments, suggestions, etc. in the body of the lesson plan. Lesson with the statement “Lesson Delivered” will be cancelled and the Teacher Trainee will be debarred from the Workshop-II. LIBERAL ATTITUDE IN THIS REGARD WILL SABOTAGE THE D.EL.ED. PROGRAMME

Workshop-II

NIOS Study Centre/Workshop Centre _______________
D.El.Ed. Programme

Call letter to the Trainees for Workshop-II D.El.Ed. Programme

From: Study Centre Coordinator
To: Address of the teacher trainee
No.: Dated:

Dear Teacher Trainee,

This is to inform you that the Workshop-II will be held for twelve days from ---------(date)--------- day to ------------(date)---------- day at this centre as per the programme given below.

- Reporting time on the first day is 9 AM
- Show this call letter and submit its Photocopy
- Show the NIOS Identity Card and submit its Photocopy
- Workshop-I completion certificate in original
- Duly filled-in proformas 1 to 4 complete in all respects in Original (one set)
  * Bring everyday with you to the Workshop potable water in a two litre bottle
  * All the photocopies should be of A4 size
  * Please see that the photocopies are distinct and readable
  * There are 4 (four) proformas enclosed with this letter
  * Those proformas need be filled up and signed by the concerned functionaries.
  * You will be permitted to continue the workshop provided you fulfil all the requirements as per each and every proforma
  * Workshop is just like Board Exam and as such 100% attendance in all sessions and on all the days is very much essential.
  * THERE WILL BE NO RELAXATION IN THIS REGARD.
  * YOU SHOULD COME TO THE PLACE OF THE VENUE ONE DAY EARLIER TO AVOID LATE REPORTING ON THE FIRST DAY
  * There will be at least two assignments everyday which you have to work late night and again in the next morning. So, staying at nearby places is essential during the Workshop period
  * IF YOU HAVE RECEIVED THE WORKSHOP-I COMPLETION CERTIFICATE AND FAILED TO DO PRACTICE TEACHING, YOU SHOULD NOT ATTEND WORKSHOP-II ALTHOUGH THE CALL LETTER IS SENT TO YOU/
  * IF LESSONS ARE INCOMPLETE AND OTHER PAPERS ARE NOT READY, YOU SHOULD NOT ATTEND THIS WORKSHOP AT ALL
  * IN THAT CASE, YOU SHOULD INFORM US IN WRITING MENTIONING THE REASON BY REG./SPEED POST

Important:-
1. You are advised to go through all the proformas and make relevant paper ready. Obtain the signatures of the Mentor, Supervisor and the Headmaster with date and seal in each of them after aking proper entries.
2. Keep with you at least one set of blank proformas for use in future
3. Prepare one set of distinct and readable Photocopies all the filled-in proformas
4. Keep the Photocopy set of the above papers with you for use in future

You are further advised to bring the
- Record of lessons delivered (40) during Practice Teaching
- Programme guide and Assignment booklet
- All course books
- PCP and Practical Manual
- 200 sheets of foolscap white paper for writing the workshop assignments
- Stapler, staple pins, gum tube, multi-coloured sketch pens, scale, pencil, eraser etc.
- A strong cover file to keep your workshop assignments and such other papers
- Write your full name, enrolment no., programme centre and details of the papers (content to be kept in the file) on a sheet of paper and paste it on the outer cover flap of the file.

Hope to see you in the Workshop and with best wishes

Yours sincerely,

(Study Centre Coordinator)

DECLARATION BY THE TRAINEE

1. Hereby I declare that all the statements contained in this proforma have been written by me in my own hand: which are true  
and if one of them is found false/fabricated I shall accept the decision of the NIOS Regional Centre, Ranchi in the matter  
without any protest.
2. I also declare that I have completed the following activities (as per NIOS guidelines issued to me at the time of admission  
and the Workshop-I) in the School under the guidance and supervision of the concerned persons and obtained their  
certificates/signatures as per instructions.  
     Lesson Plans (10) each in three compulsory teaching subject and (10) in optional teaching subject. Lessons started on----------  
----------(date) & completed on----------------------(date).
3. Further, I declare that if I am asked by the Workshop Coordinator  
I shall discontinue attending the Workshop-II from the day I if I am found irregular.
I shall attend the workshop- II next year forgoing the present one.
4. Further, I declare that I worked under the Mentor and Supervisor who supervised my classes during Practice Teaching
5. Lastly, I declare that all the statements made in this proforma are true and if anything is found wrong or misleading or  
deficient or forged during scrutiny, I shall accept the decision of the NIOS: Regional Centre without any protest and prejudice.
