NOTIFICATION

NIOS/SSS (Voc. Accr.)/80 AAC/2011

18-02-2011

It is hereby notified that as per the approval accorded by the Accreditation Advisory Committee (AAC) in its 80th meeting held on 28/1/2011 following two major decisions were taken:

1. Grant of special permission to AVIs for allowing extra intake of learners than allotted, for one session only.

Vocational Accreditation unit receives from time to time requests for additional seats for one session since they receive extra admission forms for a particular course. It is therefore, suggested that:

- ❖ If the AVI needs extra intake of learners only for one particular session then the AVI needs to give an undertaking that the centre possess adequate infrastructure needed for providing vocational training to additional students and will also provide necessary documents supporting the statement.
- ❖ If the AVI wishes to permanently increase the intake of learner in one particular course than what is allotted to them, it can do so by submitting an application form to the SSS Department. The department will then forward the application to the particular Regional Centre for getting it inspected. Upon receipt of the inspection report, it will be put up in the AAC meeting.

2. Grant of special permission to run a course with less than 10 students for one session only :

Cases where admission in Vocational Courses allotted to AVIs are less than 10 in a session may be considered particularly if AVIs are newly Accredited ones as they may take some time to make their presence felt in the location due to which they may be getting less admission in early stage. Moreover such AVIs may be catering to marginalized, deprived or rural youths of the society.

(Dr/ S. Mitra)
Director (SSS)
