We call it new media and we are using it extensively to learn new things.

NEW MEDIA: THE FORM OF COMMUNICATION

- Whenever we communicate, we share information, ideas and even feelings. At times we may not speak but the way we look at a person conveys a lot to that person.
Importantly, communication is not complete unless there is a feedback. It means whenever we talk to someone or someone reads what we have written, there must be a response from the other person.

- New media is known for its ability to involve the audience, this is known as interactivity.
- Print, television and radio all mean of communication have feedback system. But all of them New Media has the most evolved feedback system in place.
- The other feature of new media is the use of multimedia. As mentioned earlier, whenever stories are supported by cartoons, moving pictures, sound and music, it is called multimedia.

Interactivity could not limit up to ‘Blogs’, it goes beyond. Another most interactive things people are doing on Internet is to generate own web portals, running YouTube channels and also developing social media tools.

New Media has many attractive tools, which could help to bridge the communication
gaps among the specific class and gender through his interactive applications with the help on mobile phone/computer.
